

Universal 4 Channel Remote Control

Part number 851067

Kit contents:

-Key FOB -Power module -Velcro -3m double sided tape

Step 1

Find a suitable place in the engine compartment close to the battery to mount the control module.

Step 2

Once you have mounted the control module run your power and ground wires to the control module. There are 4 channels and they are ON/OFF function. Each channel can handle a max load of 20 amps. **Any products exceeding 15 amps should be wired with an external 30 amp relay. This unit will trigger the relay which will then turn your accessory on.** Be sure not to exceed this. The -/+ labels are stamped on the housing and go from left to right negative being first and positive being second for each channel. (Refer to image)

Step 3

Now that your module is mounted and your connections are made, connect the power (red) and ground (black) from the module to the battery and your installation is complete and ready to use. Your supplied Key FOB is numbered from 1 to 4 and this represents each channel. Press once to turn accessory ON and again to turn it OFF.

NOTE: This unit has a built in voltage protection circuit and will shut off once voltage drops below 10 volts

AnzoUSA™ products are covered, by a limited one (1) year warranty, to be free of manufacturer's defects. However, certain AnzoUSA™ product categories have warranty policies which differ from this standard, please contact your representative for detailed category information. Damage due to improper installation or road hazards is not covered. Seller and manufacturers' only obligations shall be to replace the product proven to be defective. Neither seller nor manufacturer shall be liable for any injury, loss or damage, direct or consequential, arising out of the use of or the inability to use the product. Before using, user shall determine the suitability of the product for its intended use, and user assumes all risk and liability whatsoever in connection therewith.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
