Transmitter Specifications

Frequency Range	2.401Ghz-2.483Ghz
Channel Space	1Mhz

Mic input Voltage	20mV
Current Consumption	180mA
Frequency Range	100Hz-7.5KHz
Signal to Noise Ratio	80dB
Mic & line Connecto	3.5mm
Battery	2500mAH
Size	85*59*19 (mm)
Weight	105g
Led Display	Charge
Lcd Display	ALL
Antenna	outside
Furthest Distance	>100m
Separation	80dB(Typical)
Distortion	<0.1%

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
