- LANDI reserves the right to modify product software, hardware or documentation without notice.
- Product details in this guide may differ from the actual product due to updates. Refer to the physical product for authoritative information.
- LANDI shall not be held liable for damages, malfunctions, data loss or accessory loss caused by operations not complying with instructions in this guide.

Use this Manual

Legend

Danger

Indicates a potentially hazardous situation which, if not avoided, could result in death or serious injury.

Warning

Indicates a potentially hazardous situation which, if not avoided, may result in equipment damage, data loss, performance degradation, or unexpected results.

Notes

Indicates important information that helps make better use of the device and features.

Important Safety Information

Safety Rules

- **Power Supply**

- Use only provided LANDI power adapter.
- Maintenance restricted to authorized LANDI technicians.
- Connect to properly rated electrical outlet.
- Ensure outlet is easily accessible and meets local regulations.
- Disconnect adapter from electrical mains network to power off.
- Shut down terminal after daily operations to save energy.
- Avoid connecting or disconnecting components while powered on.

- **Battery Safety**

- Use only LANDI-approved batteries and chargers.
- Internal lithium button battery: service by qualified technician only.
- Avoid short-circuiting, crushing, puncturing, or dismantling the battery.
- Replacing the battery with an incorrect type can defeat its safeguards and risk explosion.
- Disposing of a battery in fire or a hot oven can cause an explosion.
- Leaving a battery in extreme heat may cause an explosion or leakage of flammable substances.
- Subjecting a battery to extremely low air pressure may cause an explosion or leakage.
- Properly dispose of used batteries according to local environmental regulations.

- **Environmental Restrictions**

- Avoid use in explosion-risk areas (chemical plants, fuel depots).
- Suspend use during thunderstorms.
- Use certified protective cover near fuel pumps.
- Remove battery when on aircraft.
- Avoid harsh environments with direct sunlight, high temperatures, humidity, or dust.
- Operate and store the terminal only within the specified environmental limits:
 - Operating Temperature:
 - ✧ Non-Battery Version: 0°C to +40°C (32°F to 104°F)
 - ✧ Battery Version: 0°C to +50°C (32°F to 122°F) for discharging; 0°C to +40°C (32°F to 104°F) for charging
 - Storage Temperature: -20°C to +60°C (-4°F to 140°F)
 - Operating Humidity: 10% to 90% non-condensing

- **Health and Safety**

- Radio transmission may interfere with medical devices.
- Consult healthcare providers regarding potential interference.

-  Class 1 laser product warning.

Usage Instructions

- **Terminal Security**

- Verify PCI PTS security compliance.
- Regular inspection for tampering signs:
 - Keypad integrity
 - Unauthorized wire connections

- Card reader condition
- Report "Warning Detected" messages immediately.
- Restrict access to verified trustworthy staff.

- **Customer Protection**
 - Never request PIN disclosure.
 - Advise customers on PIN privacy.
 - Maintain terminal visibility at all times.
 - Secure terminal against theft or replacement.

- **Component Guidelines**
 - Keep SAM/SIM reader compartment cover in place.
 - Battery life factors:
 - Feature usage patterns
 - Charge cycle frequency
 - Operating temperature

- **Network Compliance**
 - Follow cellular network regulations.
 - Non-compliance may result in service ban or legal action.

- **Abnormal Conditions**

If any of the following phenomena occur during work:

- Stop operation immediately.
- Cut off power supply.
- Promptly report to service provider when:
 1. Hearing sharp noises during operation
 2. Impurities or water enter terminal
 3. Unpleasant odors emit during operation

1. Product Profile

1.1 Introduction

The P30 is a high-performance, all-in-one portable data terminal designed for modern business environments. Running on the efficient Android 14 operating system, it delivers the speed and reliability needed for seamless transaction processing. Its large 6.5-inch full-screen display provides a clear and intuitive user interface, enhancing operational ease and efficiency.

Designed for complete mobility, the terminal integrates a fast thermal printer for on-the-spot receipts and a large-capacity battery to support extended use throughout the business day. Comprehensive connectivity via 4G, Wi-Fi, and Bluetooth ensures a constant connection and easy integration with other systems. Engineered to meet rigorous industry security standards, the P30 provides a secure and trustworthy payment solution for both merchants and customers.

1.2 Unboxing Inspection

Upon opening, inspect the terminal and optional accessories for any signs of disassembly or transit damage. Check for:

- Terminal main unit
- Battery pack
- Power adapter
- Quick start guide
- USB cable

Remove all plastic packaging from the terminal and accessories. Peel off the protective film from the LCD screen. Retain the transit packaging for future transportation of the terminal.

1.3 Overview

1. NFC Reader

Reads NFC cards (including membership cards).

2. Printer Cover

Opens for paper loading/unloading.

3. LCD and Touch screen

Displays content and accepts signature input.

4. Magnetic Card Reader

Reads magnetic stripe cards (stripe facing the terminal).

5. Dual Microphone

Provides clear voice input.

6. Smart Card Reader

Insert card horizontally, chip facing up.

7. LEDs for Contactless Card

Indicate contactless transaction status.

8. Front Camera

Scans QR codes/barcodes and takes photos.

9. Power Button

Short press: Wakes up/locks screen.

Long press:

- 2-3s (when off): Powers on.
- 2-3s (when on): Powers off/restarts.
- 10-12s: Forces shutdown if system freezes.

10. Volume Buttons

Press “+” to increase, “-” to decrease volume.

11. USB Type-C Port

Supports charging and developer debugging.

12. Flashlight

Provides lighting for the camera.

13. SIM Card Slot

Accept the SIM card.

14. Micro SD Card Slot

Accepts SD card.

15. Fiscal Module Interface

Reserved for fiscal module connection.

16. Base Charging Interface

Charges terminal when placed on base.

17. Lanyard Hole

Attachment point for strap.

18. Rear Camera

Scans QR/bar codes and captures photos.

19. SAM Card Slot

Accept the SAM card.

20. Battery Connector

Connects lithium battery.

21. Magic Link Interface

Provides Ethernet, RS232, and USB ports for peripheral connectivity.

22. Speaker

Outputs audio.

2. Product Installation

The module connectors are located in a sealed compartment beneath the back cover. To access:

1. Power off the terminal and turn it face down.
2. Locate the back cover latch and push up to release.
3. Remove the back cover and the battery.
4. FCC ID and IC ID can be found on the label beneath the battery.

The product is available in two hardware configurations, distinguished by their Hardware Version Identification Number (HVIN): P3W1 for the battery version and P3C1 for the non-battery version.

2.1. Power Connection

- **Non-battery version:** Connect power adapter to start.
- **Battery version:** Place battery pack into compartment and connect battery plug.

Battery Charging

1. Connect power adapter to USB Type-C port (left side).
2. Plug adapter into power supply mains.
3. Verify charging status: Check for lightning bolt icon in screen's upper right corner.

2.2. SAM/SIM Cards

SAM/SIM Card Slots

- Upper slots: SAM2 and SIM2
- Lower slots: SAM1 and SIM1

Installation Steps

1. Orient card according to diagram.
2. Insert it into the slot until firmly seated.
3. For single card use, prefer bottom slots (SAM1/SIM1).

SIM and SAM sockets appear identical - verify correct position before insertion.

2.3. Micro SD Memory Card

1. Slide the card cover left to unlock and lift up.
2. Insert the Micro SD card with contacts facing down, aligning the notched corner as shown in the diagram.
3. Close the cover and slide right to lock.

2.4. Paper Roll

Specifications

Parameter	Value
Color	White
Width	58 mm (2.283 inch)
Diameter	40 mm (1.57 inch)

Installation Steps

1. Locate the notch at the top of terminal.
2. Lift the printer cover from the notch and push upward to fully open.
3. Insert the paper roll following the direction shown in the diagram.
4. Pull the paper end slightly beyond the cover edge and close the cover firmly until it clicks.

For new rolls, remove first complete turn to avoid printing on adhesive residue.

3. Usage

3.1. Pre-Operation Check

Before operation, ensure the thermal paper roll is properly installed.

3.2. Power Operations

- **Power On**

With battery properly installed, press the power button for 2–3 seconds until screen activates.

- **Power Off/Restart**

Press the power button 2–3 seconds, select **Power off** or **Restart** from menu.

- **Screen Control**

Short press the power button for 0.5 seconds to turn the display on or off. Alternatively, double-tap the screen to wake it.

3.3. Card Reading

- **Magnetic Card**

Swipe in either direction with magnetic stripe facing terminal.

- **Smart Card**

Insert horizontally, chip facing up; keep inserted during transaction.

- **Contactless Card**

Hold card steady against reader area until transaction completes.

Magnetic Card

Smart Card

Contactless Card

4. Maintenance

When cleaning, always disconnect the power source first. Wipe the exterior surfaces with a soft, dry cloth.

- For light dirt, dampen a clean cloth with 1–2 drops of mild, neutral cleaner. Never spray cleaners or liquids directly onto the display screen and do not use an overly wet cloth.
- For stubborn stains, gently wipe with isopropyl alcohol or an alcohol-based cleaner. Do not use diluent thinners, trichloroethylene, ketone-based solvents or other strong chemicals as these may damage plastic or rubber parts.

5. Transportation and Storage

- **Transportation**

The terminal should be handled carefully to prevent damage from rain, snow, sunlight, mechanical impacts, or dropping. The packaging must prevent crushing during transit to avoid damage.

- **Storage**

Store the product in its original packaging box. The storage area should be free of hazardous gases, flammables, explosives, corrosives, strong vibrations, impacts, or magnetic fields. Place the box at least 15 cm off the ground and 50 cm away from walls, heat/cold sources, windows, or air intakes.

6. FAQs

Question: Why won't my terminal start?

Answer:

1. Verify power supply/battery level.
2. Restart terminal.
3. If problem persists, contact customer service.

Question: Why isn't the printer working?

Answer:

1. Check power supply:
 - Battery level status
 - Power connection integrity
2. Check paper installation:
 - Paper roll orientation
 - Dust cover placement
3. If problem persists, contact customer service.

Question: Why did my transaction fail to process?

Answer:

1. Test multiple contactless cards.
2. Verify proper card swiping technique.
3. Try manual transaction mode.
4. Check card components:
 - SAM card installation
 - SIM card placement
5. Verify network connection.
6. Contact customer service if unresolved.

7. Frequency Bands and RF Output Power

ATTENTION

- The device for operation in the band 5150-5250 MHz is only for indoor use to reduce the potential for harmful interference to co-channel mobile satellite systems.
 - The maximum antenna gain permitted for devices in the bands 5250-5350 MHz and 5470-5725 MHz shall comply with the e.i.r.p. Limit.
 - The maximum antenna gain permitted for devices in the band 5725-5825 MHz shall comply with the e.i.r.p. Limits specified for point-to-point and non point-to-point operation as appropriate.
 - Users should also be advised that high-power radars are allocated as primary users (i.e. priority users) of the bands 5250-5350 MHz and 5650-5850 MHz and that these radars could cause interference and or damage to LE-LAN devices.
-
- L'appareil fonctionnant dans la bande 5150-5250 MHz est destiné uniquement à une utilisation en intérieur afin de réduire les risques d'interférences nuisibles aux systèmes satellites mobiles utilisant le même canal.
 - Le gain maximal d'antenne autorisé pour les appareils fonctionnant dans les bandes 5250-5350 MHz et 5470-5725 MHz doit être conforme à la limite de p.i.r.e.
 - Le gain maximal d'antenne autorisé pour les appareils fonctionnant dans la bande 5725-5825 MHz doit être conforme aux limites de p.i.r.e. spécifiées pour l'exploitation point à point et non point à point, selon le cas.
 - Les utilisateurs doivent également être informés que les radars de haute puissance sont désignés comme utilisateurs principaux (c'est-à-dire utilisateurs prioritaires) des bandes 5250-5350 MHz et 5650-5850 MHz, et que ces radars peuvent causer des interférences et/ou endommager les appareils LE-LAN.

7. Standards

CE SAR Statement

This equipment complies with Directive 2014/53/EU radiation exposure limits set forth for an uncontrolled environment. End user must follow the specific operating instructions for satisfying RF exposure compliance. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

The portable device is designed to meet the requirements for exposure to radio waves established by European Union market (France). These requirements set an SAR limit of 4W/kg averaged over ten grams of tissue. The highest SAR values reported, 2.842W/kg (for configuration code 61) and 2.455W/kg (for configuration code 96), are under this standard during product certification for use when properly worn on the limbs.

Hereby, Fujian LANDI Commercial Equipment Co., Ltd. declares that the radio equipment type P30 is in compliance with Directive 2014/53/EU. The full text of the EU declaration of conformity is available at <https://www.landiglobal.com>.

FCC Compliance Statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- This device may not cause harmful interference
- This device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a

particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC SAR Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. End user must follow the specific operating instructions for satisfying RF exposure compliance. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

The portable device is designed to meet the requirements for exposure to radio waves established by the Federal Communications Commission (USA). These requirements set an SAR limit of 4 W/kg averaged over ten grams of tissue. The highest SAR value reported is under this standard during product certification for use when properly worn on the extremity. This equipment should be installed and operated with a minimum distance of 0 mm between the radiator and your extremity.

ISED Compliance Statement

This device contains license-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's license-exempt RSS(s). Operation is subject to the following two conditions:

- This device may not cause interference.
- This device must accept any interference, including interference that may cause undesired operation of the device.

L'émetteur/récepteur exempt de licence contenu dans le présent appareil est conforme aux CNR d'Innovation, Sciences et Développement économique Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes:

- L'appareil ne doit pas produire de brouillage
- L'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

IC SAR statement

This equipment complies with ISED radiation exposure limits set forth for an uncontrolled environment. End user must follow the specific operating instructions for satisfying RF exposure compliance. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

The portable device is designed to meet the requirements for exposure to radio waves established by the ISED. These requirements set an SAR limit of 4 W/kg averaged over ten grams of tissue. The highest SAR value reported is under this standard during product certification for use when properly worn on the extremity. This equipment should be installed and operated with a minimum distance of 0 mm between the radiator and your extremity.

Cet équipement est conforme aux limites d'exposition aux rayonnements ISED établies pour un environnement non contrôlé. L'utilisateur final doit suivre les instructions d'utilisation spécifiques pour satisfaire la conformité à l'exposition RF. Cet émetteur ne doit pas être co-situé ou fonctionner conjointement avec une autre antenne ou émetteur.

L'appareil portable est conçu pour répondre aux exigences d'exposition aux ondes radio établies par l'ISED. Ces exigences fixent une limite de SAR de 4W/kg en moyenne sur dix grammes de tissu. La valeur SAR la plus élevée signalée est conforme à cette norme lors de la certification du produit pour une utilisation correctement portée sur l'extrémité. Cet équipement doit être installé et utilisé avec une distance minimale de 0 mm entre le

radiateur et votre extrémité.

Environmental Compliance (WEEE, Batteries and Packaging)

LANDI P30 is labeled in accordance with European Directives 2012/19/EU concerning Waste Electrical and Electronic Equipment (WEEE) and 2013/56/EC concerning Batteries and Accumulators. Those provisions are requiring producers and manufacturers to become liable for take-back, treatment and recycling upon end of life of equipment and batteries.

The crossed-out wheeled bin symbol on the product or accessories indicates it is considered electronic equipment waste (WEEE) which must be properly disposed of and should not be thrown away. Spent batteries must also be collected separately for recycling.

Please contact your retailer for more details on the take-back and recycling program in place for disposing of old equipment and batteries. Participating ensures their responsible re-use and recycling, which benefits both the environment and human health.

The Green Dot symbol on the packaging confirms it complies with Directive 94/62/EC concerning packaging and packaging waste. Packaging bearing this symbol must be returned through collection schemes managed by accredited Green Dot organizations for recovery and recycling.

RF Compliance

BE	BG	CZ	DK	DE	EE	IE	EL	UK(NI)
ES	FR	HR	IT	CY	LV	LT	LU	
HU	MT	NL	AT	PL	PT	RO	SI	
SK	FI	SE	NO	IS	LI	CH	TR	

The functions of Wireless Access Systems including Radio Local Area Networks (WAS/RLANs) within the band 5150-5350 MHz for this device are restricted to indoor use only within all European Union countries.

8. Customer Support

- **Data Backup**

Please back up all terminal data before requesting any after-sales support. LANDI does not back up data directly from terminals received for service work. We are not responsible for any data loss or deletion that may occur.

- **Repairs**

Please contact local distributors or [LANDI after-sales team](#) to arrange a repair. Be sure to keep your invoice or other valid proof of purchase documentation and present it when necessary.

- **Manufacturer**
