1

Install the App

Two ways to download

1. Visit the App Store, Google Play to search [WeEye](#) and download the free app on your smartphone.
2. Scan the following QR code to download.

Install attention:

For Android, it might pop up the security warning of getting location permission. Just click [Allow](#) to continue.

Register / Log in

For the new user, you should register an account via your Email.

Step 1: Start the App and tap **Sign Up** at the bottom of the page.

Step 2: Key in your email address and password in the corresponding fields.

Step 3: Click on **OK** when it is be done.

The image displays two overlapping screenshots of a mobile application's registration process. The background screenshot shows a blue-themed interface with two input fields labeled 'Email' and 'Password'. Below these fields is a 'Log in' button. At the bottom, a 'Sign Up' button is highlighted with a red rectangular box, and a 'Forgot' link is partially visible. The foreground screenshot is a mobile phone screen showing the 'Sign Up' form. The status bar at the top indicates the time is 4:31PM. The form has a dark header with a back arrow, the title 'Sign Up', and an 'OK' button. The form fields include: 'Email' (with an envelope icon), 'Nickname' (with a person icon), 'Verification code' (with a checkmark icon and a 'Get Verification Code' button), and two 'Password' fields (each with a key icon). The bottom of the phone screen is partially obscured by the blue app interface.

2

Set-up your camera

1. Set with Smart Wi-Fi

Step 1: Powered on the camera firstly, then wait for the voice of **Do-do**, after few seconds the red light will blinked.

Step 2: Go onto the **Camera** page, click on the icon **+** and choose **WiFi Add**.

Manual config

Return to Camera

Camera light instruction

Red light on: network abnormal

Red light blinked: waiting for monitor

Blue light on: network normal

Blue light blinked: AP mode

If it failed to set-up the network, please reset the camera and try once more, meanwhile please double check the following issues :

- 1) Check your wireless password.
- 2) Please ensure your Wi-Fi network broadcasts at 2.4GHz(802.11 b/g/n)
- 3) Move camera closer to your router. Camera out of Wi-Fi range cannot connect to network.
- 4) Restart your Wi-Fi router.

Reset: press **Button** (shown as the picture) with a Pin until hear a voice of **Dodo** and the camera red light is on.

2. Set Wi-Fi manually

Step 1: Press the **Reset Button** for 1 second, after a while the blue light blinked.

Step 2: Click on **Manual config** and follow the instructions there to set-up.

3. Set with ethernet cable

Step 1: Connect your camera to router with an ethernet cable.

Step 2: Click on the + and tap the [QR Code Add](#).

Step 3: Scan the QR code (on the back of camera) to add the camera.

3

Start live play

Select the camera in the camera list to preview.

Pan/Tilt: slide right/left/up/down direction to check almost 360 degree view.

4

Device sharing

Share the device to your friend

Click on the [Friends](#) in the home page, Select the friend which be shared, and then tap the icon [Unshare](#) to be done.

Request to share a device

Search the camera in the LAN by adding the camera, and tap the icon **Unshare** to wait for the approval.

Attention: when access to device share from others, you cannot change its settings.

5

Motion detection

Just set by clicking the icon  on the up-right of the device and select the motion detection for [low/medium/high](#) standard.

6 Playback

You can playback the video and check the moment what you missed after it is inserted the SD card.

Slide the timeline to view the image as you like.

Federal Communications Commission (FCC) Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generate, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

RF exposure warning

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.

This equipment must be installed and operated in accordance with provided instructions and the antenna(s) used for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons and must not be collocated or operating in conjunction with any other antenna or transmitter.
