Dear Sir/Madam,

RE: Modular Approval Request for Model: 44228012622, 44228012623

FCC ID: 2AGBW44228012623X

The following attestation addresses the requirements to support modular approval:

Modular approval requirement	Yes	No *
(i) The radio elements of the modular transmitter must have their own shielding. The physical crystal and tuning capacitors may be located external to the shielded radio elements.	The radio elements have the radio frequency circuitry shielded. The module has a metal shield. Refer to the external photo of EUT.	
(ii) The modular transmitter must have buffered modulation/data inputs (if such inputs are provided) to ensure that the module will comply with part 15 requirements under conditions of excessive data rates or over-modulation.	Data to the modulation circuit is buffered as described in the operational description provided with the application.	
(iii) The modular transmitter must have its own power supply regulation.	The module contains its own power supply regulation. Please refer to schematic filed with this application.	
(iv) The modular transmitter must comply with the antenna and transmission system requirements of §§ 15.203, 15.204(b) and 15.204(c). The antenna must either be permanently attached or employ a "unique" antenna coupler (at all connections between the module and the antenna, including the cable).	The module has a PCB antenna and which permanently attached the module. Refer to the photo of EUT.	
(v) The module must demonstrate compliance in a stand-alone configuration.	The module was tested and found compliant in a stand-alone configuration.	
(vi) The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number.	The module is equipped with a permanently affixed label displaying the FCC ID.	
(vii) The modular transmitter must comply with any specific rules or operating requirements that ordinarily apply to a	The module complies with all applicable FCC rules and operating requirements.	

complete transmitter and the manufacturer must provide adequate instructions along with the module to explain any such requirements.	Adequate installation and operating instructions are provided to OEM integrators and end users, as applicable.	
(viii) The modular transmitter must comply with any applicable RF exposure requirements	The module comply with applicable RF exposure requirements	

* Please provide a detailed explanation if the answer is "No."

Yours sincerely,

Name: Yefeng Zhang
