• Check the plug and make sure it is properly inserted into the wall outlet. Do not use a damaged plug or a plug that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected to the wall outlet. Do not use a damaged power source or a power source that does not fit the wall outlet. • Check the power source. Make sure the power source is properly connected
