IMPORTANT NOTICES AND SAFEGUARDS

- The Product should be stored, installed, used and maintained according to the Installation and User guide.
- Monitoring is not provided by Telecom Design. The Product is intended to be monitored by a professional monitoring service which must be contracted separately and fees paid by user.
- Do not install the Product outdoors. Product should be protected from the environment.
- Product should not be submerged in water.
- The distance at which the Product can detect jamming and communicate with a monitoring center may be influenced by several factors including obstacles, walls and weather. Telecom Design does not warrant this range and it is possible that the Product may not reach other components through no fault of Telecom Design.
- The Product does not prevent radio frequency jamming of security systems. Rather, it sends an alert when jamming is detected. While the Product will detect most jamming attempts, it may not be able to detect all frequency jamming cases.
- In case of an unauthorized entry or other incident, the SOS button on the Product should be pressed and all other appropriate protective measures taken with respect to such incident. The Product is not equipped with a siren or other means of actively deterring an unauthorized entry or other incident.

WARNING: Do not use Lithium batteries or rechargeable batteries. This device is engineered for standard 1.5V Alkaline batteries only. Using other batteries may deliver excessive initial voltage, causing irreversible damage to the internal circuitry and voiding your warranty..
