Subject: Explanation for internal FCC ID Labeling for Wireless Vehicle Sensor FCC ID:
2AGMZGC433WV1

External labeling is not desirable for the following reasons:

1. The cover is removable and can be lost or misplaced, therefore placing the label on the cover is not desirable.
2. The other external location would be on the bottom side of the plastic housing. Since the unit will be permanently mounted about 10-12" above the ground, this location is not easily viewable by the user.
3. The unit will be permanently mounted outdoor subject to environmental damaged. It is desirable to minimize the label exposure environmental damages.

Internal labeling as indicated in the attached photo would allow easily accessible and viewable by the user since he/she would have to access the control board during setting. It's also prevents the label from being lost/discard from the transmitter and/or damaged.

The FCC has provided in KDB 784784 D01, Section 3, that instead of placing the labels onto the device externally, Ghost Controls may elect to place the FCC ID inside of the removable housing of the device, as well as put the FCC ID in the printed user manual.

Model Number: AXWV
FCC ID: 2AGMZGC433WV1

Thank you,

A handwritten signature in black ink that reads 'Mickey Nguyen'.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
■ This device may not cause harmful interference.
■ This device must accept any interference received, including interference that may cause undesired operation.

WARNING

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

WARRANTY:

GHOST CONTROLS® Vehicle Sensors are warrantied for 18 months with proof of purchase. An additional 6 month warranty is available at NO COST if you register your solar panel within 30 days of purchase on www.ghostcontrols.com/register. See warranty terms on www.ghostcontrols.com/warranty.
