7. Maintenance manual

1.

Charm Ring features a pure 925 silver setting, mounted with a delicate gem of six optional colors. The correct way of maintenance could make the ring glittering, shiny and flawless. It is a necessary part of perfect performance.

2.

The best way of maintenance is to wear every day because wearing silver frequently, the ring setting will shine gentle and natural glow. (because of personal physical differences, silver will be black after wearing) when you are not wearing it, the ring should rest in a confined pocket installed to prevent the silver surface and exposed to the air and black oxide.

3.

Do not wear a silver at the same time wearing jewelry other precious metals in order to avoid a collision deformation or abrasion.

4.

Keep dry. Do not wear the ring in swimming pool. Do not wear the ring close to sea or hot spring.

5.

The galvanized ring setting should use own wiping cloth, or it would be abraded.

6. Wipe the gem surface lightly with soft cloth.

7.

While doing some housework, greasy dirt or bleaching water would influence glossiness of ring.

8.

While doing some housework, do not wear the ring. In spite of gem is stiffness and wear-resisting. A collision deformation or abrasion will happen.

9.

Severe oxidation or a loose diamond of ring, please call the helpline.

10.

At last, the ring should avoid contact with sea-water, hot spring, washing-up liquid and disinfectant. While not wear the ring, put ring in the charging case.
