Re: FCC ID 2AGUB-73000, Request for Class II Permissive Change

To Whom It May Concern,

The purpose of this letter is to request a Class II Permissive Change for FCC ID: 2AGUB-73000, originally granted June 2, 2022.

The module now installed into host platform is electronically and mechanically identical to the original certified module. The major change is the addition of new type, linearly polarized antenna to the application with lower gain than used in the original grant.

Should you have any enquiries or comments, please contact me.

Sincerely,

Petri Aronkytö
Head of Product and R&D
