Subject: Confidentiality Request Letter pertaining to the certification of FCC ID No: 2AGUHINCAP

To whom it may concern,

Medtronic MiniMed, Inc. ("Medtronic") requests that the information contained in the items enumerated below pertaining to the above-referenced application be withheld from public disclosure in accordance with Commission's Rules, 47 C.F.R. § 0.457(d) and 0.459, following grant of the application.

The confidential information is embodied in circuit diagrams, detailed explanations, parts lists, block diagram, and internal photographs of a device designed for patients under the care of a medical professional. As such, this material is treated as highly confidential business information and information that could convey trade secrets pertaining to manufacturing and design techniques. The information for which confidentiality is sought is employed in the design and manufacture of medical device systems that are offered on a highly competitive basis. Customers for this equipment have a variety of competing sources of supply from both domestic and foreign suppliers. Disclosure would, in effect, give away the fruits of the labors of Medtronic's engineering personnel, who have designed the equipment and the manufacturing processes. Disclosure would also offer competitors additional unwarranted insight into the state of product development thereby allowing such competitors an advantage that would not be available to Medtronic.

The information for which confidential treatment is sought is kept confidential by Medtronic and not made available to third parties except pursuant to arrangements designed to prevent public disclosure. To the knowledge of those preparing this application, the information has not been disclosed publicly heretofore. The protection sought is narrowly drawn and pertains to certain specific implementations of the technology incorporated into the device for which certification is sought.

Long-Term Confidentiality

The materials set forth in the following exhibits, which are segregated from the non-confidential exhibits of the application, are the ones for which Medtronic requests **Long-Term Confidentiality**:

- Internal Photos
- Schematics
- Block Diagram
- Operational description
- Parts List/Tune-Up Procedure

Following the Equipment Authorization Confidentiality Request Procedures as described in KDB Guidance 726920 D01 of April 8th, 2016, Internal Photos may be held Long-Term Confidential under the condition that the circuit board or internal components are not accessible to users.

Medtronic MiniMed's InPen Basal smart cap, which are the subject of this future filing, are not available to the public. The devices are regulated by the FDA and are available by prescription only by health care professionals. Devices have no screws and are sealed, opening the device is not possible without damaging the external case and internal parts. Therefore, the equipment to which this Long-Term Confidentiality request pertains satisfies this criterion.

Sincerely,

A handwritten signature in black ink, appearing to read "Mahtab Moberg", with a long horizontal stroke extending to the right.

Mahtab Moberg
