Security Settings and Alarm

Group Page

You can enter other team members' frequency with manual frequency modulation, and talk with them when cycling.

Cycling Log Page

The summary where you can view the cycling data and route when you are done.

Security Settings Page

1. Turn on the "Unlock Console with Fingerprint" button, and you can unlock the bike through fingerprint identification. After 5 failed identification attempts, you need to enter the passcode to unlock the bike.
2. You can change the passcode with "Change Passcode" or turn it off with "Turn off Passcode".
3. Turn on the "Alarm on Wrong Passcode" button, and the bike will be locked after 5 failed passcode attempts, and you need to unlock it using the console system. You need to download the App to activate the bike.
4. If you forgot your passcode, you can recover it by calling our Customer Service hotline or going to the servicing center.

Alarm Page

When the super bike is locked, it will activate an alarm when sensing possible theft; 10 seconds after it becomes still, the alarm will stop automatically if the bike isn't moved for at least 10 seconds. At this time, the user can view the bike's location in the App, and send commands for the bike to cancel or keep the alarm. If the user doesn't have a smartphone at hand, s/he can go to Settings > Alarm Settings to turn off the alarm button and cancel the alarm. When the super bike activates the alarm, the alarm button will be turned on automatically.

Safety Tips for Cycling

1. Please perform basic inspections, check brakes and tire pressure, and check whether other parts are loose or have abnormal noise.
2. For your safety, please wear a helmet.
3. Do not wear extra-long or extra-loose clothes, lest they get stuck in the bike's turning parts.
4. The seat and handlebar need to be adjusted to suitable heights.
5. Please check of chain tension: Pull the chain with a finger, and if the slack distance is 1 - 2 cm, you are good to go; otherwise, you need to loosen the lock nuts of the rear wheel and adjust its position until the chain has a normal tension.
6. Please observe traffic regulations during cycling to avoid danger.
7. Please be alert during cycling, paying attention to vehicles, pedestrians, road surface and weather.
8. Please stop cycling immediately if any part is damaged and may compromise safety.
9. Please perform maintenances and inspections for your bike.
10. Please do not replace any part by yourself, so as to avoid injury or danger.
11. If any problem happens during cycling, please get the bike repaired as soon as possible.
12. Please protect the bike from water damage. Do not put the bike, in whole or in part, into water or leave it in the rain.

Lighting Control

You can control the turn lights with the turn buttons on the handlebar, and turn on the head light using the light

buttons on the console. The width light and the tail light are photoconductive. During cycling, you can turn on/off the lights using the light icons on the console.

Battery

This bike has a built-in rechargeable lithium battery. The battery is security certified, providing reliable safety. Capacity: 8400mAh.

Charging

A 6V 3W hub dynamo and a voltage stabilizer are installed on the bike's front wheel, charging the battery with the power generated by pedaling. The battery level information is displayed on the upper right corner of the screen of the smart head computer. You can also charge the bike or peripherals such as smartphones and cameras via the USB port.

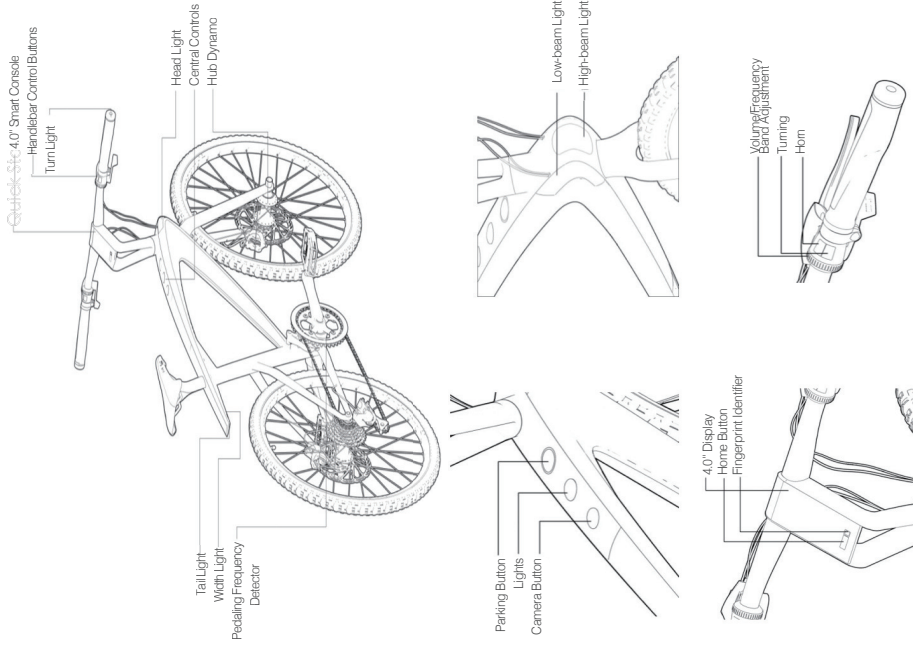

Lock Control and Antitheft

You can lock/unlock the bike in one of the following ways:

1. Use a key to lock/unlock the bike directly.
2. Press the Parking button to lock the bike.
3. Connect the bike with your smartphone through Bluetooth, and lock it in the App. When the status of the bike changes, the App will push an alarm message and display the bike's location.

Bike Accessories

You can choose a suitable cycling accessories kit as needed. The kit includes goggles, clothes, gloves, tire inflators and water bottles.

Servicing Records

Servicing Date	Failure Description/Cause/Repair Results	Spare Parts Used	Inspection Date	Name of Servicing Center/Signature of Servicing Persons

Please ask the servicing center for a servicing report and keep it properly with the warranty certificate. Tianjin Letv Flying Pigeon Smart Bikes Co., Ltd. offers Chinese 3R Warranty services for Letv Super Bikes in strict accordance with the *Provisions on the Liability for the Repair, Replacement and Return of Some Commodities*. If there are any discrepancies between the servicing terms and the 3R Warranty regulations, the servicing terms shall prevail. For regions with special 3R Warranty regulations, Tianjin Letv Flying Pigeon Smart Bikes Co., Ltd. hereby promises to abide by those relevant local regulations.

Summary of the 1-year Limited Warranty for Letv Super Bike

1. The warranty for this product complies with the Chinese 3R Warranty regulations. During the warranty period, should any failure of this product resulting from its quality issue occur, the customer can enjoy free warranty services at any Letv-authorized servicing center across China by presenting the completed warranty card and purchase invoice.
 2. Failures due to refitting or addition of other feature(s) or device(s) by the customer are not eligible for warranty services.
 3. Any alteration of the warranty card and/or purchase invoice will void the warranty.
 4. The person in charge in the servicing center will verify the bike's serial number and the warranty certificate at each service.
 5. The customer shall properly keep the purchase invoice and warranty certificate, which are proof of warranty and cannot be replaced in case of loss.
 6. In accordance with the Provisions on the Liability for the Repair, Replacement and Return of Some Commodities, the warranty doesn't apply to the following, but the product can be repaired with a fee: Damages caused by improper use, maintenance or storage by the customer.
 - 6.1 No warranty certificate or valid invoice are present.
 - 6.2 Damages caused by non Letv-authorized servicing personnel.
 - 6.3 The model on the warranty certificate doesn't match that of the product to be serviced or has been altered.
 - 6.4 Damages caused by force majeure.
 - 6.5 Failures caused by operations inconsistent with the instructions as specified in the manual.
 - 6.6 Failures, scratches or damages caused by handling or dropping.
 - 6.7 Flat tires caused by punctures by sharp objects. Specific Chinese 3R Warranty regulations apply.
- For products sold in Mainland China, the warranty and repair services will be provided according to those Chinese terms and the warranty card. Our company reserves the right of final interpretation.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

Please take attention that changes or modification not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This product has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This product generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this product does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment should be installed and operated with a minimum distance 20cm between the radiator and your body
