Made in China

A detailed line drawing of the FLEX 3 18.5 Smart Interactive Terminal, showing its internal components and the location of the label. The device has a rectangular shape with rounded corners. The top section contains several small rectangular components, likely sensors or cameras. The main body is divided into two main sections: a left section containing a large rectangular component (likely a display or touch panel) and a right section containing a smaller rectangular component (likely a processor or power management unit). The label is located on the left side of the main body, near the bottom. The label contains the text "FLEX 3 18.5 Smart Interactive Terminal", a barcode, and the CE mark. The diagram is a top-down view, showing the internal layout of the device.
