The contents of the USB flash drive cannot be read	- The USB flash drive format is not compatible with the box. - If one of the USB is not read, please pass phase the TV BOX 30 seconds and restart the TV BOX.
Slow operation of the USB flash drive	4GB file size or high resolution USB flash drive takes longer time to read and display on the TV screen.
No sound with HDMI connection	- Check the connection between the TV and the HDMI jack of the TV BOX system cable. - Check the volume.
The TV screen is blank and the player LED is blinking	- Turn off your TV BOX wait 30 seconds turn on 10 again. - Check if the USB system cable, check if HDMI connection is correct or change another HDMI cable, set the output resolution of the TV.

FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

It is your responsibility to take measures to prevent this interference. If you are unable to eliminate the interference, you may wish to consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines, this equipment should be installed and operated with minimum 20cm distance between the radiator and your body.

The following measures may be taken to reduce the radio frequency interference:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines, this equipment should be installed and operated with minimum 20cm distance between the radiator and your body.
