

Label size: 50.9*7mm

wallyHOME™

The WallyHome Multi-Sensor Helps
Protect What Matters Most...

On its own, the multi-sensor detects potential water leaks and alerts you through an audible alarm, helping to prevent property damage. Once you place the sensor, any moisture detected by the probes will trigger an alarm, notifying you of the potential leak!

Connect your Multi-Sensor to Wally® for More Features

When you connect the multi-sensor to a Wally hub¹ you receive real-time insights and mobile alerts for potential water leaks, current temperature and humidity levels and open doors or windows to better protect and monitor the health of your home.

Don't have a Wally hub?
Purchase a WallyHome Starter Kit and get connected today!
