SNOO: SAFER. BETTER. SLEEP - at the touch of a button.

Almost every aspect of life has been revamped and rebooted over the past decade. Yet, as crazy as it sounds, baby beds haven't changed in over 1000 years! Today's bassinets and cribs are just boring little "boxes" to safely store babies - away from curious toddlers or the family dog.

Unfortunately, babies don't sleep well on flat, still beds in totally quiet rooms. In fact, over 50% of babies still wake up once a night after 6 long months. That's a problem because poor baby sleep causes the #1 new parent stress: EXHAUSTION!

Sleep deprivation is grueling. And, it can trigger serious problems, like marital fights, failed nursing, anxiety, depression, accidents, even make it hard to lose that baby weight.

Besides exhaustion, today's parents struggle because they have little or no help at home. Think that's normal? Think again! Most parents - through human history - had 3-4 "nannies" to help them! (You know, their mom, grandma, cousin, friends, neighbor's older daughter).

Many moms and dads turn to bed sharing as the only way they can get their infant to sleep. Yet, tragically, 1000's of babies die each year from rolling over or sleeping in a bed with a tired adult.

Bottom line: Our babies need safer, better sleep...and new moms and dads need it, too.

That's why we created SNOO!

My dream was to mix ancient wisdom + top science to make a bed for 21st century babies. It's based on the discovery that babies sleep better with soothing rhythms of the womb, called the 5 S's (described in my DVD/book, *The Happiest Baby on the Block*.) Then, together with MIT engineers and the nation's top designer, we built SNOO, the world's 1st smart sleeper.

- SNOO gives a perfect 4th trimester of gentle shushing and rocking...all night long. And, it quickly responds to your babies' fussies with stronger sound and jiggly motion (safely moving your baby less than an inch...back and forth).
- SNOO helps most new babies on the very first day. Older babies (2+ months) may need 4-5 days to get used to the new sensations. (Visit happiestbaby.com to learn how to help your baby fall in love with SNOO.)
- If your baby's crying calms fast, your job is done. (Put your head back on the pillow!) However, if fussing continues - despite SNOO's response - you'll know that your little one needs YOU! (Now, it's your turn to offer some milk, a diaper or just a sweet cuddle.)
- When your baby gets older, the SNOO app automatically weans her off the motion.
- SNOO is the safest baby bed...ever. Zip your baby into the SNOO Sack, attach it to the clips and you'll never again have that 2 a.m panic, "Did my baby roll over?!"
- Soon, your baby will be more awake in the day and snoo-zing more at night. And, better baby sleep will lead to a happier, healthier, better rested child in the early years.

Thanks for letting *Happiest Baby* help you help your family during this magical journey!

Dr. Harvey Karp

SETTING UP YOUR SNOO

- Remove all contents from box.
- Remove SNOO from the protective cloth bag. Turn it upside down on the bag or another clean surface.

- 1** Insert each leg into base (match red and blue arrows on leg brackets to their corresponding colored arrows on base).

- 2** Push leg into base until you hear a “click.”

- 3** Hand tighten all bolts.

- 4** Insert power adapter into socket in the middle of the bottom of base (there is a red circle around the socket).

- 5** Now, place your SNOO on its four feet.

- 6** Pull soft plastic power cable holder off leg. Insert it on leg that is closest to electric wall outlet.

- 7** Insert thin power cable into entire length of power cable holder.

- 8** Plug power cord into electric outlet.

- 9** The power button at the front of SNOO will flash on and off for a few seconds before becoming a constant white light.

- 10** SNOO is now ready to help you soothe and protect your baby.

NOTE:

- ALWAYS keep SNOO on a flat, even surface (see “PREVENT STRANGULATION HAZARD” page 9).
- NEVER place anything under SNOO legs or mattress to elevate baby’s head (see “PREVENT STRANGULATION HAZARD” page 9).

USING THE SNOO SACK

- Slide the small sleep sack and insert off the safety clips. Unzip and remove the small sleep sack. We recommend machine washing in warm water prior to use.
- Place the SNOO Sack on a flat surface.

1 Unzip and open inner bands. Place baby inside the sack.

3 Always close zipper fully...at top and bottom!

2 Straighten the arms and snugly pull the inner bands around the baby. The ends of the inner bands will Velcro closed.

4 Place baby in SNOO. (Put the feet at the end nearest to SNOO power button). Slide each elastic wing loop all the way on to each safety clip.

NOTE:

- It is only safe to use the SNOO Sack with the zipper fully closed.
- To keep your baby's arms from popping out from the inner band, make sure the lower edge goes directly over your baby's hand.
- SNOO will not work unless you slide the elastic wing loops onto both safety clips.
