

## DMD Power Box Quick Start Guide

The DMD Power Box is a power distribution box that allows you to power and remotely control up to 6 devices.

Ideal to manage accessories connected to your motorcycle, 4×4 or overlander. Control heated gear, navigation gear, auxiliary lights, horns, compressors and much more.

Can be controlled over Bluetooth from within DMD2 or using the device buttons (which include state LED).

Search for DMD Power Box Bluetooth devices on a tablet or phone and connect them, which can be controlled through an app.

- Supports from 9V to 28V
- Each channel can handle up to 80A.
- IP68
- Includes idle detection input (which can be enabled or disabled from within DMD2)
- Includes extra input detection for creating rules (when it gets power it can execute rules, example: connect it to high-beam for when you turn the high-beam it also turns on auxiliary lights)

Connect it directly to the battery and connect the sleep detection cable to ignition. Once you turn your ignition on you will be able to control the 6 power outputs from inside the DMD2 app. Automatic ignition idle can be disabled / enabled from the app in case you want to manage the outputs while the ignition is off, you can turn the idle detection back on at any time.

You will be able to create rules inside DMD2 based on app events and based on device Input2.

## RF exposure statement

This equipment complies with the FCC and ISSED radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

Cet équipement est conforme aux limites d'exposition aux rayonnements de la FCC et de l'ISED établies pour un environnement non contrôlé. Cet émetteur ne doit pas être co-localisé ou fonctionner en conjonction avec une autre antenne ou un autre émetteur.

#### FCC Warning

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

#### IC WARNING

This device contains licence-exempt transmitter(s) that comply with Innovation, Science and Economic Development Canada's licence-exempt RSS(s). Operation is subject to the following two conditions:

- (1) This device may not cause interference.
- (2) This device must accept any interference, including interference that may cause undesired operation of the device.

L'émetteur/récepteur exempt de licence contenu dans le présent appareil est conforme aux CNR d'Innovation, Sciences et Développement économique Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes:

1. L'appareil ne doit pas produire de brouillage;
2. L'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.
