

Solder Board-Component View 3	 A photograph of a blue printed circuit board (PCB) component, labeled MD1060-K8-V20 and 2022-04-02, positioned horizontally against a black ruler. The ruler has white markings in millimeters and centimeters. The PCB features several gold-colored pads and solder joints. The component is placed on a blue textured surface.
Solder Board-Component View 4	 A photograph of the same blue printed circuit board (PCB) component, labeled MD1060-K8-V20 and 2022-04-02, positioned horizontally against a black ruler. The ruler has white markings in millimeters and centimeters. The PCB features several gold-colored pads and solder joints. The component is placed on a blue textured surface.

Solder Board-Component View 5	 A photograph of a solder board component, labeled 'View 5'. The component is a small, rectangular printed circuit board (PCB) with various electronic components soldered onto it. It is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The component features a large, dark, rectangular area in the center, likely a microcontroller or memory chip, and several smaller components, including resistors and capacitors, are visible around it. The board has a complex shape with multiple pins and connectors along its edges.
Solder Board-Component View 6	 A photograph of the same solder board component, labeled 'View 6'. This view shows the component from a different angle, highlighting the large, dark, rectangular area in the center and the various components soldered onto it. The component is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The component features a large, dark, rectangular area in the center, likely a microcontroller or memory chip, and several smaller components, including resistors and capacitors, are visible around it. The board has a complex shape with multiple pins and connectors along its edges.

Solder Board-Component View 7	 A photograph of a green printed circuit board (PCB) assembly, labeled 'View 7'. The board is populated with various electronic components, including a large central chip, several smaller integrated circuits, and surface-mount components. It is placed on a blue textured surface next to a black metric ruler. The ruler shows measurements in millimeters, with markings from 0 to 100 mm visible.
Solder Board-Component View 8	 A photograph of the same green PCB assembly, labeled 'View 8', showing a different side or angle. The components are visible from a different perspective, highlighting the underside of the board and the solder joints. It is also placed on a blue textured surface next to a black metric ruler, with markings from 0 to 100 mm visible.

Solder Board-Component View 9	 A photograph of a small, rectangular green printed circuit board (PCB) component. The component is positioned on a blue textured surface. A black ruler with white markings is placed below the component, showing measurements in millimeters. The ruler has markings from 0 to 100 mm, with the component's length spanning approximately 10 mm. The component has a gold-colored edge connector and some small components on its surface.
Solder Board-Component View 10	 A photograph of a larger, irregularly shaped green printed circuit board (PCB) component. The component is positioned on a blue textured surface. A black ruler with white markings is placed below the component, showing measurements in millimeters. The ruler has markings from 0 to 100 mm, with the component's length spanning approximately 40 mm. The component has a gold-colored edge connector and various components on its surface, including a barcode and text: "M011060-barcode-V10", "2022-06-15", and "3226549P13-224515".
