

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Model: MDT760

|                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                    |
|------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <div>Conducted Emission<br/>Test Setup*</div>              |  A photograph of a conducted emission test setup. On the left, a spectrum analyzer sits on a wooden desk, displaying a graph on its screen. A red cable connects it to a power supply unit on the floor. To the right, a laptop on another desk shows a software interface. The background is a plain wall with a power outlet. |
| <div>Radiation Emission Test<br/>Setup (Below 30MHz)</div> |  A photograph of a radiation emission test setup inside an anechoic chamber. A yellow test box is placed on a turntable in the center. A metal frame stands around the turntable. The walls are covered with white and blue electromagnetic wave absorbers. The floor has yellow and black striped safety markings.            |

|                                                             |                                                                                                                                                                                                                                                                                                                                                                                        |
|-------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p><b>Radiation Emission Test Setup (30MHz to 1GHz)</b></p> |  A photograph of a radiation emission test chamber. The walls are covered with white, square-shaped anechoic tiles. A yellow test fixture is positioned in the center, and a large, silver, cylindrical metal structure is visible in the foreground. The floor is a smooth, light-colored surface.  |
| <p><b>Radiation Emission Test Setup (1GHz to 18GHz)</b></p> |  A photograph of a radiation emission test chamber. The walls are covered with white, square-shaped anechoic tiles. A yellow test fixture is positioned in the center, and a large, silver, cylindrical metal structure is visible in the foreground. The floor is a smooth, light-colored surface. |

|                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|-------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p><b>Radiation Emission Test Setup (Below 30MHz)</b></p>   |  A photograph of a radiation emission test setup for frequencies below 30 MHz. A yellow test chamber is positioned on a circular turntable within an anechoic chamber. The chamber is surrounded by a black metal frame. The walls of the anechoic chamber are covered with white, square-shaped absorbers.                                    |
| <p><b>Radiation Emission Test Setup (30MHz to 1GHz)</b></p> |  A photograph of a radiation emission test setup for frequencies from 30 MHz to 1 GHz. A yellow test chamber is positioned on a circular turntable within an anechoic chamber. In the foreground, there is a large, silver, cylindrical antenna structure. The walls of the anechoic chamber are covered with white, square-shaped absorbers. |

|                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                     |
|----------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <div>Radiation Emission Test Setup (1GHz to 18GHz)</div> | A photograph of a radiation emission test setup. A white, rectangular device is placed on a yellow wooden crate in the center of an anechoic chamber. The chamber walls are covered with white, square-shaped absorbers. The floor is covered with a dense layer of blue, conical-shaped absorbers. A red antenna is visible on the right side of the chamber, connected to a black cable.                          |
| <div>Radiation Emission Test Setup (Above 18GHz)</div>   | A photograph of a radiation emission test setup, similar to the one above. A white, rectangular device is placed on a yellow wooden crate in the center of an anechoic chamber. The chamber walls are covered with white, square-shaped absorbers. The floor is covered with a dense layer of blue, conical-shaped absorbers. A blue cable is visible on the right side of the chamber, connected to a black cable. |

\* Means' only test and setup for PART 15C.
