Conducted Emission Test Setup*	 A photograph showing a conducted emission test setup. On the left, a spectrum analyzer is placed on a wooden desk, displaying a graph on its screen. A red cable connects it to a power line filter unit on the floor. To the right, another wooden desk holds a laptop with a blue screen, a black tablet, and a power supply unit. The background is a plain grey wall.
Radiation Emission Test Setup (Below 30MHz)	 A photograph of a radiation emission test setup inside an anechoic chamber. The walls are covered with white, square-shaped electromagnetic absorbers. In the center, a white, box-like test fixture sits on a metal stand. A black frame is positioned around the fixture, and a small black device is mounted on top of it. The floor is made of metal plates with yellow and black safety stripes.
