

MediaWave PC  
Version: 1.0

action against another participant is a criminal offence. This equipment provides users and case contacts with frequency ranges, and free, real-time and ad hoc locations with the use of mobile phone data. The equipment also provides communications. However, it is guaranteed that interference will not occur in a particular installation. This equipment does not guarantee interference-free use of telecommunication systems, which can be determined by taking the equipment and the use of the system as envisaged by it to correct the interference to one or more of the following measures:

- Deleted or reduced the use of the equipment;
- Increase the separation between the equipment and receiver;
- Change the equipment to adjust to a small difference from that by which the receiver is sensitive.

- Connect the device or an approved radio frequency transmitter to the system.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: 1) This device may not cause harmful interference, and 2) this device must accept any interference received, including interference that may cause unintended operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment complies with FCC radiation emission limits for use as an unlicensed equipment. The equipment must be installed and operated with minimum distance as shown on the rear panel of the equipment.
