Typically Application

WiFi repeater mode:

This WiFi repeater is used to extend the signal coverage of exist WLAN.

Recommended application scenarios: villas, duplex buildings, public indoor places.

Installation procedure:

1. Plug the repeater into the power outlet and wait for the power and signal strength indicator to be red.
2. You can connect to a wireless network called "D3IN_WiFi" by using a mobile phone, tablet or computer.
3. Open the browser, enter the login URL "192.168.1.1" and password "admin" to enter the main menu.

4. Select fast settings for wireless signal extension

5. Select the name of the wireless network which you want to connect to in the page that appears, enter the password for the wireless network, and click on the link to submit it.

6. Please wait for about 25 seconds, after the success of the repeater connected, please go back to your device WiFi settings interface, connected to the name "XXX ext" network (XXX is the AP's SSID which is chosen in step 5), which is the extended WLAN.

FCC Warning:

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance between 20cm the radiator your body: Use only the supplied antenna.
