◆ Product Schema

VIVI Z101

◆ Basic Operations

1. Power-on

Press the button in the center (switch button) and hold for 1s. When the indicator light turns blue, the vibrator turns on.

2. Power-off

Press the switch button and hold for 1s when the vibrator is on. When the indicator light flashes and fades off, the vibrator turns off.

3. Switching the vibrating mode

Switch among different preset modes in turn by short-pressing the button in the center.

4. Adjusting vibrating intensity

When disconnected with the phone, control the vibrating intensity by pressing the button “+” and “-”

5. Battery Charging

Plug the needle-shaped tip of the cable into the charging hole, and the square-shaped end into USB port or USB power adapter, then the vibrator is being charged. It takes about 2 hours to be fully charged. In the state of charging, the indicator light keeps on in red. When fully charged or plugged out, the red light turns off.

Use only the charge cable we attach to the vibrator. And you may use any power adapter which is commonly used for mobile phone charging.

◆ Attentions & Daily Maintenance

1. Do not soak the vibrator fully in water or other liquids for long time.
2. Water-based lubricant is suggested to be used together in the course of using the vibrator.
3. Pay attention not to get the device stained with chemicals such as massage oil, skin cream, gasoline, and so on.
4. Use the specific cleaner to wash the vibrator for de-germing before or after use, or simply wash with clean water.
5. This product is not a toy, so please keep it out of children's reach.

◆ Download & Install Me&Ta App

and watch the video at the same time (phone needs to be rotated).

- ❖ More functions are available, such as remote interaction and social networking, when there is the local server support.
- ❖ FCC Statement
- ❖ 1. This device complies with Part 15 of the FCC Rules.
Operation is subject to the following two conditions:
 - ❖ (1) This device may not cause harmful interference.
 - ❖ (2) This device must accept any interference received, including interference that may cause undesired operation.
- ❖ 2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

- ❖ NOTE:
- ❖ This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.
- ❖ This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
 - ❖ Reorient or relocate the receiving antenna.
 - ❖ Increase the separation between the equipment and receiver.
 - ❖ Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 - ❖ Consult the dealer or an experienced radio/TV technician for help.
