

Differences letter for FCC ID: 2AHIR-003

The product certified under 2AHIR-003 will be available in several models based on what functionality that is enabled for that particular model. All models are based on the same generic product with same hardware and software.

Model Number	Functionality
1100022	Generic version with all sensors mounted and enabled
1101022	Magnet Sensor, for door window status
1102022	Temperature, Ambient light, Air humidity sensor
1103022	Magnet Sensor Pro, Including removal tamper alarm
1104022	Water leakage detector, temperature sensor
1105022	Temperature, ambient light sensor (outdoor)

Design:

The design separates the transceiver including radio protocol stack completely from the sensors by having a separate u-Controller and software for that functionality. This grants that the transceiver is identical for all variants, down to PCB layout and radio protocol stack.

u-Controller with sensors

Transceiver with antenna

Declaration

Sensitive declare and guarantee that all model's under FCC ID 2AHIR-003 are identical in RF and EMC performance

Sincerely,

By:
