- ANSI C63.10:2013

1.8 Applicable standards

According to the specifications of the manufacturer, the EUT must comply with the requirements of the following standards:

- FCC Part 15 Subpart C §15.247.
- FCC Part 15 Subpart C §15.109.
- RSS-247 Issue 1, RSS-GEN Issue 4.

1.9 Observation and remarks

The EUT, Deeper Smart Sonar PRO (DP1H20S10) is variant of the model Deeper Smart Sonar PRO+ (DP1H10S10). The difference between these 2 models is that the Deeper Smart Sonar PRO (DP1H20S10) has a depopulated GPS module. For this reason only additional radiated spurious emission measurement have been performed. In report number 160200396 300 all the other test results can be found.

1.10 Conclusions

The sample of the product showed NO NON-COMPLIANCES to the specifications stated in paragraph 1.8 of this report.

The results of the test as stated in this report, are exclusively applicable to the product items as identified in this report. Telefication accepts no responsibility for any properties of product items in this test report, which are not supported by the tests as specified in paragraph 1.8 "*Applicable standards*".

2.5 Sample calculations

Field Strength Measurement example:

Frequency (GHz)	Polarization	Height(m)	Peak (dBμV/m)
7,2	Vertical	4	42.2

The following relation applies:

$$E \text{ (dB}\mu\text{V/m)} = U \text{ (dB}\mu\text{V)} + AF \text{ (dB/m)} - G \text{ (dB)} + CL \text{ (dB)}$$

Where:

E = Electric field strength

U = Measuring receiver voltage

AF = Antenna factor

G = Gain of the pre-amplifier

CL = Cable loss

$$(42.2 = 36.02 + 36.4 - 37.62 + 7.2)$$
