	increase volume	Double Tap the control surface on the R side
	reject phone	Long press the R side control surface for 2 seconds
	voice assistant	Triple tap the control surface on the R side

PAIRING

- Once fully charged open the cover of the charge case. The indicator lights on both earbuds will flash. Wait until one of them stops flashing.
- Once only one earbud's indicator light is flashing you may now search for **“BY-BE-230”** on your device's Bluetooth® list and pair it.
- You can now listen to music or make a call.
- Once you have successfully paired your earbuds to your device the first time as described above you only need to remove them from the charge case and they should connect automatically to your phone if your Bluetooth® is turned on.
- If you encounter any issues you can always unpair them from your device and begin this process again.

CHARGING

- Replace the earbuds in the case.
- Connect the USB Type C charging cable to charging port on the bottom of the case.
- Plug the charging cable into a standard USB 5V/1A or higher power output.
- When the charge case is charging, the indicator light will flash Red light. When fully charged, the Red light will stay solid.
- If you want to charge the earbuds from the charge case internal battery, simply place them back in the charge case, they will glow solid Red, and the charge case indicator light will glow solid Blue to indicate charging. The lights will shut off after they are fully charged.

POWER ON/OFF

- Long press the L/R side control surface for 3 seconds to turn ON the earbuds (the earbuds will automatically power ON when removed from the charge case).
- Long press the L/R side control surface for 5 seconds to turn OFF the earbuds (the earbuds will automatically power OFF when placed back in the charge case).
- If the earbuds are not connected to any device for several minutes, the earbuds will automatically power OFF.

PLEASE NOTE

- Do not abuse this product, and do not squeeze it between heavy objects.
- Keep this product far away from high temperature and humidity.
- Keep this product away from high frequency transmitter equipment, this will affect the local signal reception, resulting in sound breakup and distortion or disconnection.

If for any reason you move out of the range of the device you are listening to while using this product, the earbuds will disconnect. When you are back in range you may need to perform the pairing procedure again as this depends on battery life. If the earbuds are powered on and are disconnected from a Bluetooth® device for more than 3 minutes they will power off.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
 - Increase the separation between the equipment and receiver.
 - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 - Consult the dealer or an experienced radio/TV technician for help.
- Caution: Any changes or modifications not expressly approved could void the user's authority to operate the equipment.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction
