

F/X LIGHT SHOW REMOTE HUB

3 grounded outlets and plug
Rated: 125VAC/60Hz/6A/750W Tungsten
Each outlet 2A/250W Tungsten maximum
Battery: 3V CR2032 (included)
Frequency: 315MHz

INSTRUCTIONS:

1. Insert the receiver base's 3-prong plug into a grounded outlet.
2. Plug light sets into the 3 outlets on the receiver base. Do not plug more than 250W of lights into any one outlet of the receiver base. If watts are not marked on your light string, multiply the ampere rating by 125 to determine equivalent watts.
3. Using the snowman ornament transmitter, press the corresponding button to activate the desired light and music effects.
4. Excessive switching between effects may cause the receiver to stop responding. If this occurs, simply turn off the remote to reset its internal computer chip, wait a few moments, and then turn the unit back on.

FEATURES EXPLAINED	ON / OFF	All 3 outlets are steady on, with no special effects
	FADING	3 outlets gradually turn on & off in a random fading pattern
	CHASING	3 outlets illuminate on & off one at a time in sequence to create a chasing effect
	FLASHING	3 outlets rapidly turn on & off for a flashing effect
	LIGHT SHOW	Continuously runs through the above effects including steady on

FCC STATEMENT :

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

Warning: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

- Consult the dealer or an experienced radio/TV technician for help.
