This image shows the internal components of a laptop, specifically the RF module and antenna. The RF module is a green printed circuit board (PCB) with a white label that includes a QR code and technical specifications. The antenna is a small, gold-colored component located near the RF module. Red arrows point to the RF module and the antenna, with labels "RF Module" and "Antenna" respectively. The background shows the internal structure of the laptop, including the hinge and the bottom cover.
