3-Axis Gimbal for Mirrorless Camera

GuiLin FeiYu Technology Incorporated Company

## 1. Installation

Attention: Please complete the following instructions before power on the gimbal

### Attention

As the stabilizer comes with boot self-test function, such as the stabilizer due to no load, the balance adjustment is less than ideal, or due to the intensity adjustment does not fit and other reasons cause the stabilizer vibration is too large, the gimbal will automatically enter the standby mode.

### 1 Installation

Please keep the camera close to the panning!

(1) Place the camera correctly and adjust the skateboard, and use a Thumb screw to secure the camera through the middle hole in the bottom of the skateboard.

(2) Place the phone correctly and adjust the skateboard, and use a thumb screw to secure the phone through the middle hole in the bottom of the skateboard.

## 2 Insert the batteries

Prior to use, please be sure to fill the batteries.

Remove the handle, insert 2 pcs 18650 batteries and tighten the screw.

## 2. Modes / Functions

### Working Modes

#### Panning Mode

Tilting and rolling direction are fixed, and the camera lens moves according to the hand movement of the user.
