MAIN BOARD TOP VIEW

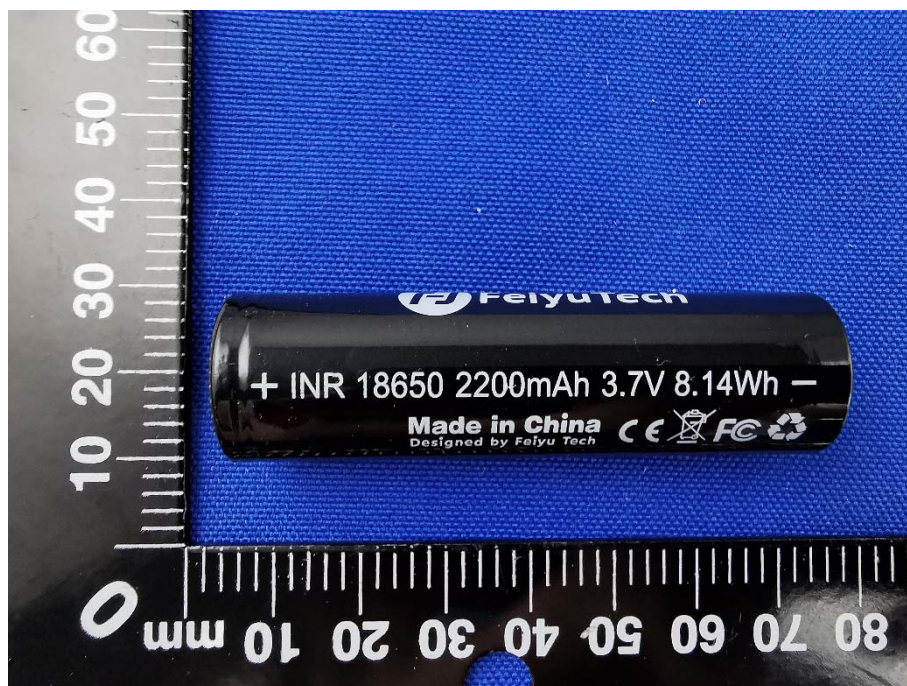

MAIN BOARD REAR VIEW

A photograph of the RF chip and PCB antenna assembly. The assembly is mounted on a blue printed circuit board (PCB). A ruler is visible at the bottom of the image, showing measurements in millimeters (0 to 70 mm) and centimeters (10 to 50 mm). The RF chip is a small, square component with a red label "RF Chip" pointing to it. The PCB antenna is a larger, rectangular component with a red label "PCB Antenna" pointing to it. The PCB also features a circular component, likely a capacitor or inductor, and several small surface-mount components. The text "LQ 1936" is visible on the PCB near the RF chip.
