

CLASSICAL INTELLIGENCE

Model S1C Plus Smart Watch

USER GUIDE

Thank you for purchasing the bit Watch. In addition to being a full function smart watch, the bit Watch enjoys elegant styling. Its design fits comfortably on your wrist whether male or female. However elegant and smart the bit Watch is, it's also durable. The watch has a metal bezel and handles moisture and water splashes with no worry.

The bit Watch is designed to work with either iPhone or Android phones. Please read these instructions carefully to insure maximum benefit of your bit Watch. Be sure to download the Bit Watch app available in both Apple App store and Google Play store.

We wish you years of enjoyment with your bit Watch, and good health!

Important-Follow these steps before using your S1C Plus Smart Watch

I. Download App-Go to the app store on your phone and search for "Fundo wear". Download it to your smartphone. The app is available in both the Apple App store and the Google Play store.

II. Register on the Fundo wear app-Click the "Register" tab and follow the instructions. This will insure accurate and through tracking of your data.

III. Connect S1C Plus Smart Watch with your smart phone via Bluetooth -

step one: Make sure Bluetooth is turned ON on both your smartphone and on S1C Plus Smart Watch.

step two: Once S1C Plus appears as discoverable on your smart phone, select it from the phone. S1C Plus Smart Watch and smart phone will now pair.

Note: For iPhone, it's common for Smart Watch to pair twice.

step three: Open the app and select green circle with+in it, and then it start to automatic searching the device and select"S1 PLUS". The bluetooth symbol will now turn green and S1C Plus Smart Watch. Smart Watch will now wirelessly interact with the app on the smart phone.

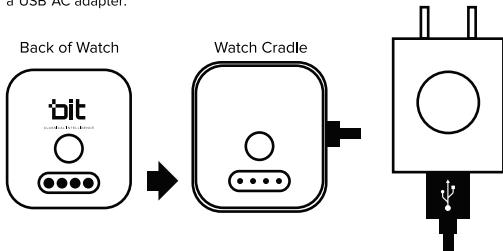

Model S1C Plus- What's Included

Charging S1C PlusSmart watch

IMPORTANT: Please charge your S1C PlusSmart watch fully before using. Normal full charge takes about 2 hours.

Bit S1C Plus Watch comes with a charge cradle, a USB charge cable and a USB AC adapter.

To charge, placed the watch into the cradle and make sure the contacts on the back of the watch align with the contacts in the cradle. Connect the Large end of the USB charging cable to the AC Adapter, and the small end into the port on the cradle. Plug the AC adapter into an AC outlet. Note: for portable convenience, S1C Plus Watch can charge from a powered USB port without the use of the AC Adapter.

Power and Sleep Functions

Turn S1C Plus ON - Press and hold the Power / Function button on the side of the watch until the bit logo appears on screen.

Turn S1C Plus OFF – Press and hold the Power / Function button until the bit logo appears. The watch will now shut down.

Turn screen ON or OFF – If the screen is dark, tap the Power / Function button to turn it on. Likewise, if the screen is on, tap the button to turn it off. Note, screen will automatically turn off based on the setting for Timeout. You can adjust to your preferred timeout by going to: Settings>Display>Screen time out.

Motion wake – You may choose to turn the screen on by arm motion, such as checking the time. Go to Settings>Motion>Wake-up gesture and select On.

Power/Function
Button

Navigating S1C Plus Smart Watch

Apps on the S1C Plus Smart Watch are arranged by category into a series of screens. Each Apps screen contains 3-4 Apps. While viewing clock, Swipe left or right, or up or down to access Apps screens. Swipe left or right to change Apps screens. Within Apps, swipe to the directions of arrows to access different levels. To return to clock, swipe up or down. Exit apps back to Apps screens by swiping left to right. You may also use the Power / Function button to exit apps and return to the clock.

Operation Through Bluetooth Device

S1C Plus Smart Watch can interface through bluetooth headphones giving added convenience and benefit. Before making this type of connection, make sure S1C Plus Smart Watch is paired to your smart phone, and is connected (Please refer to step III. on page 3). Next, make sure your bluetooth headphones are also paired to your smart phone, but not connected. Then follow these steps carefully:

S1C Plus Frequently Asked Questions

1. S1C Plus smart watch will not turn ON.

Check the connection when charging. It's likely either the USB cable does not have a secure connection or the AC charger is not completely plugged into the AC outlet. Also, if using an extension cord, please check for secure connections. Also insure the watch is fully seated in to the charging cradle.

2. How to change the clock style?

Go to Settings>Clock>Clock type; swipe left or right to view available styles, then select OK for your choice.

3. How to change background theme?

Go to Theme App, Select Theme1, Theme 2 or Theme 3.

4. Having trouble pairing Bluetooth with smart phone.

Be sure Bluetooth power is ON in S1C Plus smart watch. Go to Settings>BT Settings>. If Power shows OFF, tap to turn to ON. Make sure Bluetooth is ON in smart phone.

5. How to change ringtone and alert types?

Go to Settings>Sound, then select desired function and make your choice.

6. How to change audio volume of S1C Plus smart watch?

Go to Settings>Volume>Multimedia, then either increase or decrease.

7. How to turn S1C Plus display ON by moving your wrist?

Go to Settings>Motion, then select from available options.

8. How to synch time on S1C Plus smart phone?

Go to Bit Watch App on smart phone. Make sure Bluetooth is connected from the S1C Plus to the App. From the App Home page, tap the "synchrodata" icon in upper right side, and it can Synch.

9. How do I regulate which notifications I receive on S1C Plus smart phone?

S1C Plus smart watch will receive all notifications that your smart phone receives. If you wish to adjust these you will need to make the adjustments from your phone.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.
