

FOR WIRELESS HEADPHONES

EN Caution FCC Statement for Users

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including that which may cause undesired operation.

Federal Communication Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. This equipment does cause harmful interference to radio or television reception if it is found to be interfering, and the user is advised to stop using the equipment if it is found to be interfering. If it is found to be interfering, the user is advised to take one or more of the following measures:

- Reorient or relocate the receiving antenna.
 - Increase the separation between the equipment and receiver.
 - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 - Consult the dealer or an experienced radio/TV technician for help.
- If you cannot eliminate the interference, the FCC requires that you stop using your product. Changes or Modifications not expressly by the party responsible for compliance could void the user's authority to operate the equipment.

FCC Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.

CAN ICES-0038(NB)-0038

Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Maximum RF Output Power

Frequency Range: 2402 MHz – 2480 MHz

ISED RSS-102 Declaration of Conformity

Herby, PEAG LLC d/b/a JLab Audio declares that this wireless headset is in compliance with Directive 2014/53/EU. The full text of the EU declaration of conformity is available at the following internet address: inf.labs.com/compliance

SAR Rating

Bluetooth Transmitter Power max: 12.5 dBm (18 mW)

Frequency Range

2402 MHz – 2480 MHz

Prevention of Hearing Loss

Caution: Permanent hearing loss may occur if earphones or headphones are used at high volume for prolonged periods of time. For EU, the headphones have been tested to comply with hearing protection level requirement laid down in the applicable EN 50332-1:2013 and EN 50332-2:2013 standards as required by EU requirements (EN 62368-1).

WEED Notice

Note: To prevent possible hearing damage, do not listen at high volume too long periods.

RoHS Compliance

This product is in compliance with Directive 2011/65/EU amended by (EU) 2015/863 of the European Parliament and of the Council of 4 June 2015 on the restriction of the use of certain hazardous substances in electrical and electronic equipment.

EU Batteries Directive 2013/24/EU

A new battery directive 2013/24/EU on Battery and Accumulator replacing directive entered into force on 01/07/2015. The directive applies to all types of batteries and accumulators (AA, AAA, button cells, lead acid, rechargeable) as opposed to those incorporated in appliances except for military, medical and power tool applications. The directive sets out the requirements for collection, treatment and disposal of waste batteries and accumulators, hazardous substances and to improve environmental performance of batteries and all operators in the supply chain.

Instructions for use on Removal, Recycling and Disposal of Used Batteries

To remove the batteries from your equipment or remote control, remove the procedure described in the owner's manual for inserting batteries. Once the batteries are removed, that lasts for the lifetime of the product, removal may not be possible for the user. In this case, recycling or recovery centers handle the dismantling of the product and the removal of the batteries. For any reason, it becomes necessary to replace such a battery, the procedure must be performed by authorized service centers. In the European Union and other locations, disposal of used batteries is regulated by law. Do not dispose of used batteries in an environmentally sound manner. Contact your local waste-management officials for information regarding the environmentally sound collection, recycling and disposal of used batteries.

WARRANTING

Warning: Danger of explosion if battery is incorrectly replaced. To reduce risk of fire or burns, don't disassemble, cut, puncture, short external contacts, expose to temperature above 60 °C (140 °F), or dispose of in fire or water. Replace only with specified batteries. The symbol indicating separate collection for all batteries and accumulators shall be the crossed-out wheeled bin shown below:

CAN ICES-0038(NB)-0038

Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
