

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	
EUT Housing and Board View 2	

EUT Housing and Board View 2	 A photograph showing the internal components of a mobile phone, including the battery, camera, and various electronic components, placed next to a ruler for scale. The components are mounted on a black printed circuit board (PCB). The ruler is marked in millimeters, with a scale from 0 to 100 mm visible.
Solder Board-Component View 1	 A photograph showing the soldered components on the PCB, including the battery, camera, and various electronic components, placed next to a ruler for scale. The components are mounted on a black printed circuit board (PCB). The ruler is marked in millimeters, with a scale from 0 to 100 mm visible.

Solder Board-Component View 2	 A photograph of a rectangular electronic component, likely a battery or sensor module, placed on a blue surface. The component has a black top layer with gold-colored rectangular pads. A white connector with multiple pins is attached to the bottom. A yellow label with text is visible on the black surface. Two rulers are placed around the component for scale: one vertically on the left and one horizontally at the bottom. The vertical ruler shows markings from 0 to 70 mm, and the horizontal ruler shows markings from 0 to 100 mm.
Solder Board-Component View 3	 A photograph of the same electronic component as in View 2, but from a different angle. The white connector is now at the top, and the bottom of the component shows several circular gold-colored contacts. The yellow label is still visible. The same two rulers are present for scale, with the vertical ruler on the left and the horizontal ruler at the bottom.

Solder Board-Component View 4	 A photograph of a mobile phone motherboard (PCBA) laid flat on a blue surface. The board is populated with various electronic components, including a large central processor chip, memory modules, and various connectors. A black ruler with white markings is placed vertically to the left of the board, showing measurements in millimeters. The board's dimensions are approximately 150mm in height and 60mm in width.
Antenna View	 A photograph showing the back of a mobile phone with its back cover removed, revealing the internal battery and antenna components. A red box highlights the area at the top of the phone, labeled "NFC/ Wireless Charger Antenna". A red line points from this label to the antenna area. A black ruler with white markings is placed horizontally below the phone, showing measurements in millimeters. The phone's dimensions are approximately 150mm in height and 60mm in width.
