

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup*	 A photograph showing a conducted emission test setup. On the left, a spectrum analyzer sits on a wooden desk, displaying a graph on its screen. Below it, a power supply unit is connected to the desk's power strip. To the right, another wooden desk holds a power strip and a mobile phone. The floor is concrete, and the background is a plain wall.
Radiation Emission Test Setup (Below 30MHz)	 A photograph of a radiation emission test setup inside an anechoic chamber. A yellow test box is placed on a circular turntable. The turntable is supported by a metal frame and a vertical rod. The walls of the chamber are covered with white, square-shaped electromagnetic absorbers. The floor is dark and reflective.

Radiation Emission Test Setup (30MHz to 1GHz)	 A photograph of a radiation emission test setup for the 30MHz to 1GHz frequency range. The setup is located inside an anechoic chamber with white pyramidal absorbers on the walls. A yellow test fixture is positioned on a turntable. A metal arm with a probe is extended towards the fixture. The floor has yellow and black striped safety markings.
Radiation Emission Test Setup (1GHz to 18GHz)	 A photograph of a radiation emission test setup for the 1GHz to 18GHz frequency range. The setup is located inside an anechoic chamber with white pyramidal absorbers on the walls. A yellow test fixture is positioned on a turntable. A red probe is visible on the right side. The floor is covered with blue pyramidal absorbers.

**Radiation Emission Test
Setup (Above 18GHz)**

* Means' only test and setup for PART 15C .
