

Label location on product

FCC ID is labeled by using laser marking process. It's highly durable and clear to read. We are using minimum 1mm text which is known to be easily readable.

Label location is on outer surface of product. Please note that exact location may change due need to place other markings. FCC ID text and code are always kept together.

Trademark and model is also laser etched to product.

Below is the text which is laser marked to surface:

FCC ID:2AI5J-PLKA1

Here is an example of readability of laser marking on label area. 1mm text in real product surface.
