RE: CONFIDENTIALITY REQUEST FOR "ARGUS – Border Protection", FCC ID
2AI6Y-ARGUSBP

To Whom It May Concern:

This letter serves as an official request for confidentiality under sections 0.457 and 0.459 of CFR 47. We have requested that the block diagram, schematics, parts list, and operational descriptions required to be submitted with this application be permanently withheld from public review.

The ARGUS Border Protection system is a physical perimeter intrusion detection system that will be used to protect personnel and high valued assets. Publication of the above documents would expose design details that could possibly be used to compromise the intrusion detection capabilities of the system. Furthermore, the documents are company proprietary information that should not be made available to our competition.

Please contact me if there is any information you may need.

Sincerely yours,

David Mayhew
Principal Engineer
Intelligent Automation, Inc.
