You can use the virtual keyboard to dial the number directly, also dail by searched contact list numbers. It support the search contact name by first letter of the name, part letters of the name,full spelling of the name and also by phone number;The search results will seqence by matching level.

Key instruction

1. On/Off
2. Home
3. Camera
4. Screen
5. Microphone
6. Speaker

Remark: Keep Pressing "On/Off" button to start the watch
Keep Pressing"On/Off"button to power Off the watch

1. Insert the SIM card

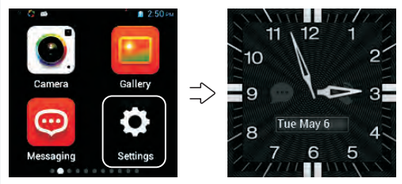

Warm Tips: Pls ready the followed parts for the first using of our watch:1 Mini SIM card, 1 screw-driver(included in retail package),wireless network ,1 android smartphone

1. Charging dock

The Dial Settings

Open the dial setting application, browse the dial, choose your prefered dial display. And you can set the dial after tapping your perfered dial display.After the setting,it will popup a message to say with success.Then you can choose to continue browsing or exiting.

Remark:

Date and time settings: Open "Settings" -> "System" -> "Date and Time", click "Determine the date and time automatically ", choose to use the network time, or GPS time, or closed with manually setting.

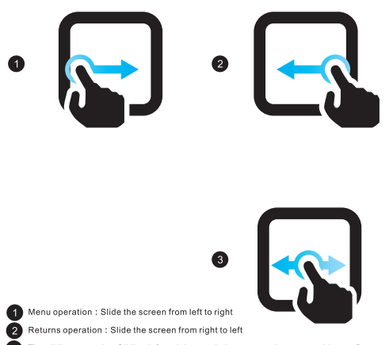

Sent SMS

When write SMS, you can add to one or more recipients. Message content support sending files or insert images, expression, contact information,audio and video. Long press the message content, you can choose to lock, forwarding, copy the text messages, view, delete information etc.

Hand Gestures

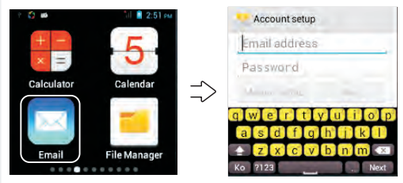

1. Menu operation : Slide the screen from left to right
2. Returns operation : Slide the screen from right to left
3. The sliding operation:Sliding left or right to switch pages on the screen with your fingers

Contact list

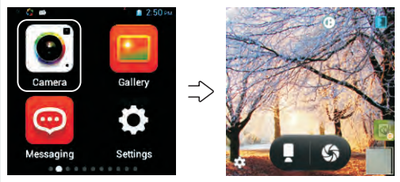

When first use, please select the way of import contacts. We support various ways to add contacts. You can import a phone card and SD card contacts, or set the synchronization account, can also direct new contacts. You can manage the contact lists in detail by pressing the menu button at the bottom.

Write mail

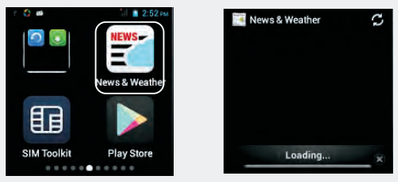

After seting up your e-mail account, you can use the watch to send mail., You will receive the first time reminder when a new mail in.

Take photos or video

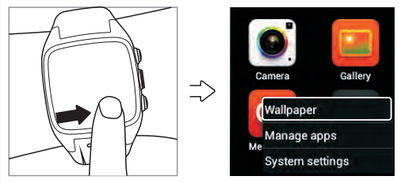

Open the camera program to take photos,which support continuous capture mode and time-lapse mode. To take video,you only need to slide virtual key to the camera icon.

News and Weather

Open the application,you can acquire newest news information and weather conditions

Change Wallpaper

1、Long press on the blank of the main screen (desktop),there will pop up "the choice of wallpaper sources", you can replace your prefered wallpaper here.
2、To replace the wallpaper you can open "setting" - >" equipment "- >" display "- > " wallpaper ", and then change the wallpaper.
3、You can also slide in the main screen from the left to right,then find the "wallpaper" , click and change the wallpaper.
4、You can also find directly in the gallery on your perfered piture,and then set it as the wallpaper for watch.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-- Reorient or relocate the receiving antenna.
-- Increase the separation between the equipment and receiver.
-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

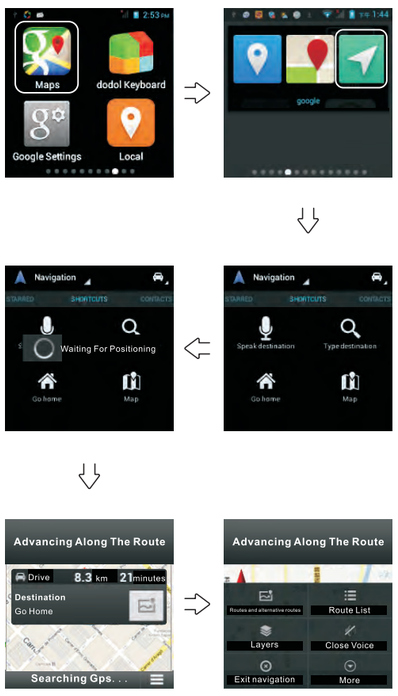

SAR:
The radiated output power of this device is below the FCC radio frequency exposure limits. Nevertheless, the device should be used in such a manner that the potential for human contact is minimized during normal operation.
The exposure standard for wireless devices employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/Kg. Tests for SAR are conducted using standard operating positions accepted by the FCC with the device transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the device while operating can be well below themaximum value. This is because the device is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output. To avoid the possibility of exceeding the FCC radio frequency exposure limits, human proximity to the antenna should be minimized.
To comply with RF exposure requirements, a minimum separation distance of 10 mm must be maintained between the user's mouth and this watch during voice communications.
Thia device is restrictd to worn on the wrist operations.

Gallery

The gallery program support reviewing picture according to the folder path, you can click the picture to zoom the selected single picture, you can also click on the left or right to switch up or next a picture; And when you click the picture you can find the showing or hidden menu control function.

GPS Navigation

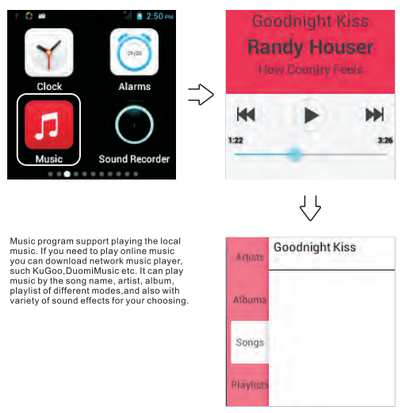

Open the navigation software (Google map or Baidu map), click to choose navigation way, you can choose: tell the destination "or" input destination ".It will run navigation operation after positioning.

Internet

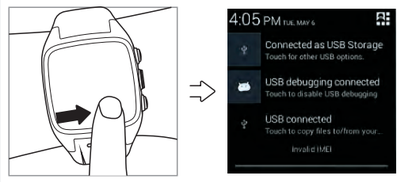

The browser supports double-click or two fingers to zoom webpage toggle. Intelligent full screen with browsing area in best fitting.

Music

Music program support playing the local music. If you need to play online music you can download network music player, such KuGoo,DuomiMusic etc. It can play music by the song name, artist, album, playlist of different modes,and also with variety of sound effects for your choosing.

Message Checking

When you have new notification on call or SMS etc , you can slide down to view the details.There is quick switch button on the top notification bar, and you can slide to choose more switches.
