ACCEPT MATCHING REQUESTS FROM YOUR FAMILY OR FRIENDS

on the lamp you wish to connect to:

Have your lamps completed setup? Great, take a look at the below questions in order to use your lamp! We hope you love staying connected with friends & family using Totwoo Lamp.

Q & A:

Q. How do I turn my lamp off?

A. To turn your lamp off simply hold the top touch pad down and release and your lamp should turn off.

If your friend taps their lamp, then your lamp will light up once more. If you wish to keep the lamp off for set times, then you can manage this by using the sleep timer in the app.

**Q. Does the other lamp light up as soon as I touch mine?
Is there a delay?**

Yep, the other lamp or lamps light up as soon as you tap your lamp. There is no delay unless there's a problem with the Wi-Fi connection at either end.

Q. How do I reset my lamp?

A. You can easily reset your lamp in the totwoo app. However if you wish to do this manually then please hold down the touch pad for 7 seconds and the lamp will scroll through the colors and then eventually go dim red.

Q. How do I send a color?

A. To send a color simply tap your lamp and it will send your color to all the other lamps on your group.

Q. How do I change colors on my lamp?

A. To change a color, simply hold your finger on the touch button and the favorite color options will cycle through. When you are happy with the chosen color, then simply tap again and the color will be sent to your group.

Don't forget that you can choose from unlimited color options on the app.

Setup Guide

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20 cm between the radiator and your body.
