side-2

OPERATION

Power on and charging

Before first time use, charge the speaker using the supplied USB-C cable. Plug the cable into the type-C port on the speaker and the other end to a power source. The LED Charging status indicator will light up RED during charging and will turn off once fully charged. Press and hold the Power button for 3 seconds to turn the speaker on.

Bluetooth paring

When the speaker is turned on, it will automatically enter Bluetooth mode. udio tone will play and a blue light will flash rapidly to indicate speaker is ready for pairing. On your Bluetooth device, look for GC6033 in the list of detected devices, AND pair with it. Once successfully paired, a notification sound will go off.

The speaker and your Bluetooth device will remember each other and automatically connect when they are both turn on.

Micro SD card mode

Put a Micro SD Card to connect your device through the Micro SD card socket on the back side of the unit.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
