8. AUX port: plug a AUX cable(not included) to connect to an external audio device.
9. DC IN: use the supplied USB-C cable to charge the speaker.
10. LED Charging status indicator

side-2

OPERATION

Power on and charging

Before first time use, charge the speaker using the supplied USB-C cable. Plug the cable into the type-C port on the speaker and the other end to a power source. The LED Charging status indicator will light up RED during charging and will turn off once fully charged. Press and hold the Power button for 3 seconds to turn the speaker on.

Bluetooth paring

When the speaker is turned on, it will automatically enter Bluetooth mode. The LED light indicator will flash blue, indicating that the speaker is ready for pairing. On your Bluetooth device, look for GC6034 in the list of detected devices, AND pair with it. Once successfully paired, a notification sound will go off and the LED light indicator flashing slowly. The speaker and your Bluetooth device will remember each other and automatically connect when they are both turn on.

AUX mode

Connect your audio device to the AUX port on the speaker using the AUX cable(not included). The speaker will automatically enter AUX mode.

TWS (True Wireless Stereo) mode

The speaker supports TWS and can pair with another speaker (same model). After turning on both speakers, press the button GC on either on of the speakers. You will hear a prompt tone, indicating that the two speakers have paired successfully with each other (the LED light indicator will light up blue) and is now ready to pair with your Bluetooth device (make sure the speakers are connected to each other before pairing to your Bluetooth device).

Note: before TWS pairing, make sure the speakers are not connected to any Bluetooth device.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
