1 Download APP

Your Smart Switch works together with our "TELEHEMS" APP. At present we provide Android and iOS version. You can download our APP in three ways.

- 1) Scan the QR code below with your smart phone.
- 2) Search "TELEHEMS" on Google Play or APP Store.
- 3) Access the URL below with your smart phone.

<http://us.telehems.net:10002/usappdownload>

2 Login/Register

You must register an account for accessing our service. E-mail or mobile registration is highly recommended. You can login to our HEMS-Energy Management System after successful registration.

3 Add Appliance

Plug in the Smart Switch. Double-click the button until the indicator lights flash red and blue:

- Click "+" button on the top right corner in the APP. Chose F2 Smart Switch.
- Enter WIFI password and click **【Start】**.
- After successful connection, choose name and type of your appliance.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

MPE Requirements

To satisfy FCC RF exposure requirements, a separation distance of 20 cm or more should be maintained between the antenna of this device and persons during device operation.

To ensure compliance, operations at closer than this distance is not recommended.
