KNOW YOUR SOLARIN

FRONT VIEW

1. Front camera and flashlight
2. Loudspeakers
3. Earpiece
4. Notification LED
5. Main microphone
6. Volume keys and SIM tray
7. Additional microphones

BACK VIEW

8. SOLARIN Security Switch
9. Flashlight
10. Main camera
11. Power button & Fingerprint sensor
12. Headset jack
13. USB type-C connector
14. Near Field Communication (NFC)

PLACING A SIM CARD

SOLARIN supports a nano-SIM card.

The SIM tray is located behind the volume keys. To open the SIM tray, hold the phone with the screen facing downwards and use the thin edge of the SIM tool.

Please note that the SIM tray does not fully detach from the phone and should be handled with care.

CHARGING

Charging the phone with the charger provided will be faster than using a standard USB charger.

Use the cable to connect the phone to the charger.

POWERING ON

To turn the phone on, press and hold the power button until the screen comes to life.

The power button serves as a fingerprint sensor. To authenticate a user, touch the fingerprint sensor without holding it down and then follow the instructions on the screen.

SAR & SAFETY / WARRANTY

SAR & SAFETY

SAR & SAFETY FOR EUROPEAN MARKETS

Before turning on your phone, please review the basic safety information. While using your phone, be aware of the following common-sense guidelines.

RADIO WAVE EXPOSURE AND SPECIFIC ABSORPTION RATE (SAR) INFORMATION

This device (model: SOLARIN) has been designed to comply with applicable safety requirements for exposure to radio waves. These requirements are based on scientific guidelines that include safety margins designed to assure the safety of all persons, regardless of age and health.

The radio wave exposure guidelines employ a unit of measurement known as the Specific Absorption Rate, or SAR. Tests for SAR are conducted using standardized methods with the phone transmitting at its highest certified power level in all used frequency bands.

The SAR limit recommended by the International Commission on Non-Ionizing Radiation Protection (ICNIRP) is 2 W/kg averaged over 10 g of tissue.

The highest SAR value for this model phone tested for use at the ear is 0.345W/kg (10 g) and when worn on the body is 1.556 W/Kg (10 g).

This device meets RF exposure guidelines when used either in the normal use position against the ear or when positioned at least 0.5 cm away from the body. When a carry case, belt clip or holder is used for body-worn operation, it should not contain metal and should position the product at least 0.5 cm away from your body. In order to transmit data files or messages, this device requires a quality connection to the network. In some cases, transmission of data files or messages may be delayed until such a connection is available. Ensure the above separation distance instructions are followed until the transmission is completed.

DECLARATIONS OF CONFORMITY

Hereby, SIRIN LABS, declares that SOLARIN phone is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC. The declaration of conformity may be consulted at www.sirinlabs.com/support/safety/DoC

SAR & SAFETY FOR US AND CANADIAN MARKETS

Before turning on your phone, please review the basic safety information. While using your phone, be aware of the following common-sense guidelines.

RADIO WAVE EXPOSURE AND SPECIFIC ABSORPTION RATE (SAR) INFORMATION

This device (model: SOLARIN) has been designed to comply with applicable safety requirements for exposure to radio waves. These requirements are based on scientific guidelines that include safety margins designed to assure the safety of all persons, regardless of age and health.

The radio wave exposure guidelines employ a unit of measurement known as the Specific Absorption Rate, or SAR. Tests for SAR are conducted using standardized methods with the phone transmitting at its highest certified power level in all used frequency bands.

SOLARIN phone is also designed to meet the requirements for exposure to radio waves established by the Federal Communications Commission (USA) and Industry Canada. These requirements set a SAR limit of 1.6 W/kg, averaged over one gram of tissue.

The highest SAR value for this model phone tested for use at the ear is 0.727W/kg (1g) and when worn on the body is 0.787 W/Kg (1g).

This device meets RF exposure guidelines when used either in the normal use position against the ear or when positioned at least 1.5 cm away from the body. When a carry case, belt clip or holder is used for body-worn operation, it should not contain metal and should position the product at least 1.5 cm away from your body. In order to transmit data files or messages, this device requires a quality connection to the network. In some cases, transmission of data files or messages may be delayed until such a connection is available. Ensure the above separation distance instructions are followed until the transmission is completed.

US DECLARATIONS OF CONFORMITY

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC ID: 2AIP8I

No changes shall be made to the equipment without the manufacturer's permission as this may void the user's authority to operate the equipment.

This device and charger has been tested and found to comply with the limits for a class B digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference with radio communications.

CANADA DECLARATION OF CONFORMITY

This device complies with Industry Canada's license-exempt RSSs. Operation is subject to the following two conditions:

- (1) This device may not cause interference; and
- (2) This device must accept any interference, including interference that may cause undesired operation of the device.

IC: 21579-I

PRODUCT MODEL REGULATORY INFORMATION

Information regarding regularity is available: System settings > About phone > Regulatory notice

ROHS STATEMENT

This product does not contain any of the substances, listed in accordance with EU RoHS (Restriction of Hazardous Substances) Directive 2011/65/EU.

NICKEL

The surface of this product is nickel-free.

LASER

This device employs a Laser system. To prevent direct exposure to laser beam, do not try to open the enclosure or make direct contact with the laser. To ensure proper use of this product, please read this owner's manual carefully and retain for future reference. Should the unit require maintenance, contact an authorized service center. Use of controls, adjustments, or the performance of procedures other than those

specified herein may result in hazardous radiation exposure.

HEARING PROTECTION

This product employs a large audio level system. To prevent possible hearing damage, do not listen at high volume levels for long periods. Protect your hearing and ears when using a headset

- Excessive exposure to loud sounds can cause hearing damage.
- Exposure to loud sounds while walking may distract your attention and cause an accident.

EU RECYCLING NOTICE

DISPOSAL OF YOUR OLD DEVICE

All electrical and electronic products should be disposed of separately from the municipal waste stream via designated collection facilities appointed by the government or the local authorities. The correct disposal of your old device will help prevent potential negative consequences for the environment and human health. For more detailed information about disposal of your old appliance, please contact your city office, waste disposal service or the shop where you purchased the product.

DISPOSAL OF WASTE BATTERIES/ACCUMULATORS

This symbol may be combined with chemical symbols for mercury (Hg), cadmium (Cd) or lead (Pb) if the battery contains more than 0.0005% of mercury, 0.002% of cadmium or 0.004% of lead. All batteries/accumulators should be disposed separately from the municipal waste stream via designated collection facilities appointed by the government or the local authorities. The correct disposal of your old batteries/accumulators will help to prevent potential negative consequences for the environment, animal and human health. For more detailed information about disposal of your old batteries/accumulators, please contact your city office, waste disposal service or the shop where you purchased the product.

REGULATORY INFORMATION

Information regarding regularity, FCC ID & IC is available: System settings > About phone > Regulatory notice

WARRANTY

Your SOLARIN phone includes a two-year limited international warranty from the date of purchase, accessories include a one-year limited international warranty from the date of purchase (the "Warranty Periods" and the "Limited International Warranty", respectively).

The benefits given to you by SIRIN LABS Limited International Warranty are in addition to other rights and remedies you may have under your country's consumer laws or any other applicable law, in relation to the SIRIN LABS device to which the Limited International Warranty relates. SIRIN LABS Limited International Warranty does not exclude, restrict or modify any statutory rights or remedies which cannot be excluded under any applicable law.

During the Warranty Periods, SIRIN LABS will repair, modify or replace, at SIRIN LABS sole discretion, any defective parts, or any parts that do not properly operate for their intended use, provided that notice of any claimed defect has been submitted to SIRIN LABS within the Warranty Periods.

Subject to the Limits of Warranty set forth below, no charge will be made to the client for the repair or replacement of any such parts under such Limited International Warranty.

Any claim made under SIRIN LABS Limited International Warranty must be addressed to SIRIN LABS store or to SIRIN LABS customer support together with the proof of date and place of purchase. Detailed information about SIRIN LABS store and SIRIN LABS customer support can be found within SIRIN LABS website: www.sirinlabs.com/support/warranty

LIMITS OF WARRANTY:

Damage resulting from repair services provided anywhere other than at an official or recognized SIRIN LABS repair center (specified at: www.sirinlabs.com/support/warranty) is not covered and shall void the Limited International Warranty.

Damage to or defects in (other than manufacturing defects) appearance, decorative, scratches, dents and cosmetic, are not covered under the Limited International Warranty.

The Limited International Warranty does not cover any damage resulting from an accident, negligence, exposure to: liquids, sand, chemicals, fire or improper handling, nor does it apply, on a more general basis, if there is evidence of misuse or abuse.
