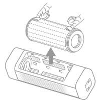
Product maintenance

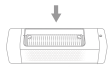
Change Filter

1. Pull the filter handle, remove the old filter.



2. Remove the new filter plastic packaging, avoid of affect the rice car air purifier normal work.

3. Push the filter into place, to keep the handle on the filter placed outside, easy to remove the next time and then close filter cover.



4. Filter reset and then restart the machine, select the manual reset in the APP, APP will prompt whether to re-calculate the filter life.

Remind

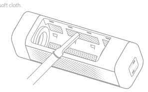
Filter replacement period is 3-6 months, when the yellow light flashing and the APP display "replacement filter" prompt; it means the filter need replacement.

Please purchase the filter from www.mi.com
o ensure the normal operation of the purifier and purification effect, please use original Xiaomi filter.

Product maintenance

1. Clean the filter box

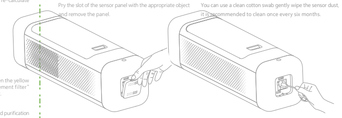
To ensure ventilation and purifying effect, use a vacuum cleaner to clean the dust attached to the air inlet and the filter box, or gently wipe with a soft cloth.



2. Clean the dust sensor

Pry the slot of the sensor panel with the appropriate object and remove the panel.

You can use a clean cotton swab gently wipe the sensor dust, it is recommended to clean once every six months.



Basic Parameter Data

Model	CZJHQ01RM	Noise	≤55dB(A)	Rated voltage	12V ⎓
Dimensions	380 × 112 × 112mm	Net weight (N.W)	1500g	Rated power	6.5W
CADR PM2.5	60m³/h	CCM particulates	>1000mg	Purification efficiency	High level
Wireless connection	Bluetooth 4.1	Power cable	4.5m	Suggestions for suitable area	4.2-7.2m²
Device requirements	the device which have android 4.4 or ios7.0 and above version (iPhone 4s and above), support Bluetooth 4.0				

This device contains model approval code: Radio transmission module of CMIIT ID:2016DP1395
FCC ID:2AIS7-2017CZJHQ01RM

Poisonous and harmful material declare

The name and content of the poisonous or harmful material						
Part name	Harmful material					
	Pb	Hg	Cd	Cr(VI)	PBB	PBDE
Outer components	O	O	O	O	O	O
Electrical parts	X	O	O	O	O	O
Internal component	O	O	O	O	O	O
Bracket accessories	O	O	O	O	O	O

This sheet is made by the standard SJ/T 11364

O: Represent that the content of this poisonous and harmful material in all homogeneous material of this component is below the requirement listed in GB/T26572. The Limitation Requirement of Poisonous and Harmful Material in Electronic Product

X: Represent that the content of this poisonous and harmful material in at least one homogeneous material of this component is over the requirement listed in GB/T26572.

RoHS CE

Notice

Move

- When moving, be sure to stop the device and pull out the power plug.
- To ensure that the device is stable, to avoid excessive vibration or fall wounding

Installation

- Make sure that the machine and the bracket is in place to prevent it from loosening, slipping or falling during travel When installing the machine, notice the placement of it.
- Make sure that the indicator light is facing the direction of the cab.
- The best location of the bracket installed is on the headrest of the back row's copilot seat. Don't suggest you install on the front row's headrest. If it can't be installed on the back row's headrest, we recommend the purchase of the corresponding accessories to install.

In use

- If the device occurs abnormal sound, smell, high temperature, fan irregular rotation and other abnormal circumstances, please stop using immediately.
- Do not place your fingers or foreign matter in the protective part, movable part, air inlet or outlet.
- Do not place hair, fabric, etc. near the device, so as not to get involved or block the air inlet or outlet.
- Do not sit, lean on or tilt the device.

Use restrictions

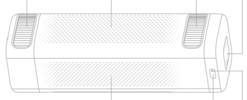
Do not use the machine during the following conditions, otherwise there will be electric shock, collision and other secondary injuries.

- The bracket is damaged, the machine can't be fixed in the car when prohibited.
- Keep away from liquids such as beverages.

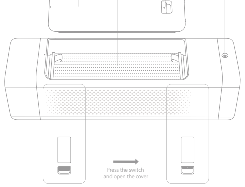
Vehicle Air Purifier Manual

Please read this manual carefully before using, and keep it for backup using.

Product profile

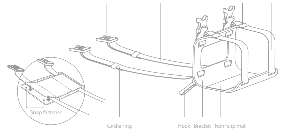


Product profile



Accessories

1. Bracket × 1



2. Leather liner × 1

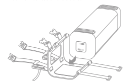
Press the button on the back of the leather to secure the pad on the front strap.The final installation results refer to "product installation" step 5.

3. Power cable × 1 (4.5m)

Product installation

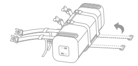
1. Install the machine

Notice the machine direction during the installation. Make sure to keep the keys and indicators facing the direction of the cab. The air outlet should be facing upwards when the machine mounted on the bracket.



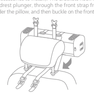
2. Fix the machine

Pull the strap up and pull the buckle into the hook and hold the machine



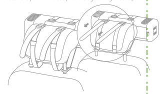
3. Install the bracket

The best location of the bracket installed is on the headrest of the back row's copilot seat. Don't suggest you install on the front row's headrest. (If it can't be installed on the back row's headrest, we recommend the purchase of the corresponding accessories to install). The brackets hook into the rear headrest plunger, through the front strap from the head under the pillow, and then buckle on the front buckle.



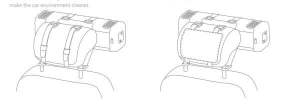
4. Fix the bracket

Buckle the front buckle. Boost the machine as high as possible, so that the hooks tightly hook the headrest plunger. And then pull the tape hard, until the bracket and headrest firmly fit can't shake. If you need to install a leather pad, fasten the pad on the strap before tightening the strap.



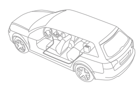
5. Storage straps

If the strap is too long, the excess part will be inserted into the belt loop. Wrapped with a leather liner, the installation can make the car environment cleaner.



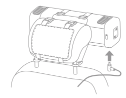
6. Power supply embedding

If you do not have the experience of car cable embedding, we recommend that you go to the nearby 4s shop or reliable auto repair shop, ask the experienced master to help embed the wire.The diagram is as below:



7. Power connection

Connect the power cable to the connector on the side of the machine, and then insert the car charger into the cigarette port to complete the power connection.



Start using

Power on/off, Operation modes switch

Long press the button 3 seconds means turn on / off the machine.Click to toggle the operating mode, and then press the button as the order "mute mode, standard mode, speed mode, automatic mode".

Operation indicator light

Green ☺ ◀ ▶ ☹ Red (Yellow)

The green light means "Good air quality".
The yellow light means "normal air quality".
The red light means "red air quality".

The red light turns off automatically after 0.5 seconds	Fan stop rotation / low frequency voltage
The yellow light continues to blink	Filter expiration remind

※ The indicator flashes mean a fault or the filter expires, and the user can connect to the APP for more information.

Operation mode sound prompt

Short sound twice	Turn on the machine
Short sound once	Manual mode to switch fan gear
Long sound once	Fan abnormal
	Low battery voltage
	Standby

Quick setup

This product is compatible with "Mijia" intelligent platform, can be controlled by the "Mijia" APP, support MIUI system.

1. Download Client
   Search the "Mijia" APP on the application store.
2. Add the device
   Open the page "my device" on Mijia APP, add "Mijia car air purifier" in the upper right corner of the page click on the "+". You can find it in the "My Devices" list, once you add it successfully.
3. Bluetooth connection
   Open the Bluetooth of the cell phone, the system will automatically paired connection.
4. Purchase more Xiaomi device
   If you want to buy more intelligent products with good quality, please download the Mijia APP and login to the Mijia online store.
