EUT Test Conditions during Testing

The transmitters of the EUT were in continuous transmit mode during all the tests. The hopping was stopped and the EUT was configured into the wanted channel using software provided by the manufacturer. Normal modulation was applied in all the tests. Transmitters 1 and 3 were set to transmit continuously without any duty cycle.

Following channels were used during the tests:

Transmitter 1 (remote controller): 2402.5 MHz

Transmitter 2 (Bluetooth): 2440.0 MHz

Transmitter 3 (remote controller): 2471.5 MHz

TEST RESULTS

Conducted Emissions In The Frequency Range 150 kHz - 30 MHz

Standard: ANSI C63.10 (2013)
Tested by: MIH
Date: 23 October 2017
Temperature: 23 °C
Humidity: 19 % RH
Barometric pressure: 1019 hPa
Measurement uncertainty: ± 2.9 dB Level of confidence 95 % (k = 2)

FCC Rule: 15.207 (a)
RSS-GEN 8.8

Conducted disturbance voltage was measured with an artificial main network from 150 kHz to 30 MHz with 4.5 kHz steps and a resolution bandwidth of 9 kHz. Measurements were carried out with peak and average detectors. The USB port of the EUT was connected to a portable computer.

Computer used:
 type HP EliteBook 8540w, s/n CND1177MFQ

The input voltage of the computer was 115V 60Hz during the test.

Frequency of emission (MHz)	Conducted limit (dB μ V)	
	Quasi-peak	Average
0.15-0.5	66 to 56*	56 to 46*
0.5-5	56	46
5-30	60	50

*Decreases with the logarithm of the frequency.

In any 100 kHz bandwidth outside the frequency band in which the spread spectrum or digitally modulated intentional radiator is operating, the radio frequency power that is produced by the intentional radiator shall be at least 20 dB below that in the 100 kHz bandwidth within the band that contains the highest level of the desired power. In addition, radiated emissions which fall in the restricted bands, as defined in Section 15.205(a), must also comply with the radiated emission limits specified in Section 15.209(a).

The correction factor in the final result table contains the sum of the transducers (antenna + amplifier + cables).
