INSTALLATION

■ Plug In

Screw the light bulbs into the sockets and turn the power on. The bulb should be quickly flashing 2x per second.

*If bulbs don't flash, see reset instructions on P.10

ADD DEVICE

- Open Smart Life App. Make sure WIFI are enabled and make sure that Smart Life has 'Nearby Device' permission.

01

In the Smart Life App, on the top corner of the devices screen, tap 

02

Searching nearby device automatically and wait for seconds.

03

Device found and tap 'Add'.

04

Choose 2.4G Wi-Fi and input password.

*NOTE: Smart bulbs can't connect to 5GHz networks.

05

Initializing device.

06

Connected.

Choose Color and Adjust Brightness

- Lightinginside smart bulb has a broad range of color options:

01

Choose from 2700K warm white to 6500K cool white. Use the slider to adjust the brightness.

02

Choose 16 million colors from the color wheel. Use the slider to adjust the brightness.

QUESTIONS TROUBLESHOOTING NOTICES

Frequently Asked Questions

■ **Can I share with family and friends?**

Yes, You can share your bulbs with family and friends who will have access to control your bulbs and other Smart Life devices. From your main device list, choose the device that you want to share. Press the profile button '⌵' and tap on the 'Share Device' button. You will be able to give or revoke sharing permissions. Ensure the other users should already have downloaded the Smart Life App and registered a new account.

■ **Can I group multiple smart LED bulbs?**

Yes, you can group multiple smart LED bulbs of the same type, by room, location, or however else you want. The same devices can be in multiple groups. (For example, create a group for 'Bedroom' and another group for 'Entire House', and your Bedroom lights can be included in both groups). From your main device list, tap on one of the devices you want to group. Press the '⌵' button on the top right for advanced settings, and tap 'Create Group'. You'll then be able to choose which devices you'd like to group and will be able to rename them.

■ **The device suddenly drops offline and becomes unreachable, what should I do?**

- Refresh the Smart Life home page in case there is a network delay.
- Check if the password of your 2.4G Wi-Fi is changed or router is down.

- Please set the light to pairing mode by switching it on/off/on /off/on (1s interval) and then connect it again. Please contact our email customer service (support@lightinginside.com) or toll-free phone customer service 877-522-8599 (Weekdays 8 am - 5 pm PDT/7 am- 4 pm PST) if the problem remains unresolved.

■ **What's the wireless range?**

The range of your home Wi-Fi is heavily dependent on your home router and the conditions of the room. Check with your router specifications for exact range data.

■ **If my Wi-Fi/internet goes down, will the smart device still work?**

Smart Life products need to be connected to Wi-Fi to use them remotely.

■ **Cannot connect to the Smart Life App?**

- Check if you downloaded the correct Smart Life App.
- Check if you choose a 2.4G band Wi-Fi and enter the right password.
- Please make sure the location access and Bluetooth access are enabled on your phone control center.
- Check phone settings if Smart Life has 'nearby' permission, this is usually for Android phones only.
- Check whether the light blinks rapidly during pairing mode, if not please follow the reset instructions to initialize pairing mode.
- Please make sure the smart device and phone are closed during pairing and covered with a good Wi-Fi signal. Poor signal would result in 'connection failed'.

* Please scan the QR code to watch the video for a detailed set-up guide.

- **Bulbs flicker or flash with a dimmer switch?**
Set wall dimmer to Max setting, bulbs will stop flickering.
- **How to reset the device?**
Turn bulbs on-off-on-off-on to initialize pairing mode.
You'll see the bulb flashing quickly (2x per second), then try to add bulbs again.

VOICE CONTROL GUIDE

Name and Control Each Device by Voice

Make sure your devices are already set up using the Smart Life App.

Sync to Alexa

- Method One
 - 01 Tap the '✎' icon.

02

Tap the Alexa icon, follow the instruction to link your Smart Life account to Alexa.

■ Method Two

01

Open the Alexa App and go to Skills in the menu.

02

Search for 'Smart Life' then tap 'Enable'

03

Authorize your account with Smart Home Skills using the username and password from your Smart Life App.

Account

 +1 ▼ Type your account here

Account

Type your password here 

Link Now

04

Choose 'Discover Devices'. After a few seconds your Smart Life devices will be displayed under Smart Home in the Alexa App.

Discover Devices

Smart Home devices must be discovered before they can be used with Alexa.

CANCEL DISCOVER DEVICE

- Please scan the QR code to watch the video for detailed set-up guide.

- **You can rename your devices in the Smart Life App, and Alexa will refer to them by the same name.**

So if you rename a smart bulb to 'Living Room Light' or a nickname like 'Color Light', then Alexa will use that same name later on.

- **Alternatively, you can create an Alexa group, like 'Bedroom' or 'Downstairs', and add the device to the group.**

This group made by Alexa can also support Alexa's voice control.

Things you can say*:

'Alexa, turn on my bedroom light.'
'Alexa, turn off the light.'
'Alexa, set bedroom light to orange.'
'Alexa, set the bulb to warm white.'
'Alexa, set living room to 50%.'
'Alexa, dim living room light to 10%.'

*Some commands require compatible devices.

Make sure your devices are already set up using the Smart Life App.

Sync to Google Home

■ Method One

01

Tap the '✎' icon.

02

Tap the Google Assistant icon, follow the instructions to link your Smart Life account to Google Home.

■ Method Two

01

Open the Google Home App and go to Home Control in the menu.

02

Tap 'Set up device'

03

Choose 'Smart Life' from the list of Home Control partners.

04

Authorize your account with Google Assistant using the username and password from your Smart Life App.

Now your Google Home App and Lightinginside devices are linked!

You're now able to say 'Hey Google' and control your Smart Life devices.

- At any time, go into the 'Home Control' section of the Google Home App to set nicknames and rooms for your devices. **You can rename your devices in the Smart Life App, and Google Assistant will refer to them by the same name.**

So if you rename a smart bulb to 'Living Room Light' or a nickname like 'Color Light', then Google Assistant will use that same name later on. You can always give it a nickname using the Google Home App as well. **You can also assign smart bulbs to a specific room, like a bedroom' or 'Kitchen'.**

Google Assistant will be able to control devices by room.

Things you can say*:

'Hey Google, turn on my bedroom light.'
'Hey Google, turn off the light.'
'Hey Google, set bedroom light to orange.'
'Hey Google, set the bulb to warm white.'
'Hey Google, set living room to 50%.'
'Hey Google, dim living room light to 10%.'

*Some commands require compatible devices.

Add Siri Shortcuts

01
Scene - Tap to Run-
Create Scene

02
Add task

03
Add task to Siri

04
Complete the voice
command

05

Tap 'Edit - Customize' to add 'Smart Life Short-cut' on widget screen

06

Tap the icon or use the voice command to execute the task

FCC Notice*

- This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
 - Reorient or relocate the receiving antenna.
 - Increase the separation between the equipment and receiver.
 - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 - Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

- This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
 - (1) This device may not cause harmful interference.
 - (2) This device must accept any interference received, including interference that may cause undesired operation.

FCC Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment .

This transmitter must not be co - located or operating in conjunction with any other antenna or transmitter.

This equipment should be installed and operated with minimum distance 20cm between the radiator& your body.
