Subject: Family Declaration Letter

FCC ID: 2AJ99-CMWA-6120

We, SKF France, confirm that the IMX-1 wireless sensor models CMWA 6120, CMWA 6120-EX, CMWA 6420 are variants of the same product. All three models are identical in hardware design, including electronic components and internal architectures.

The differences between the three variants are:

- CMWA 6120: Standard sensor
- CMWA 6120-EX: Exactly the same as CMWA 6120 with different label, intended to be used in explosive environments.
- CMWA 6420: Same hardware as CMWA 6120, but different firmware.

These differences have no impact on RF performance or emissions, and all variants are manufactured using the same assembly process and materials.

We confirm that all 3 variants are part of the same product family for regulatory purposes.

Should you have any questions, please do not hesitate to contact us.

Best regards,
