

The label design and label place.

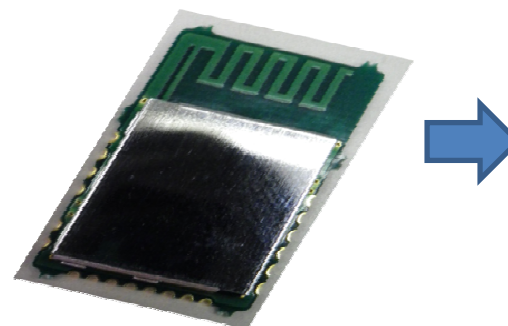

The label design

Place of a label

A label is stuck on the upper side of the shield case.

About the model difference of PX-BML

- “-XXX” is marking after a model name as sales customer management.
- “-XXX” is expressed by a numbers of 1 to 9 and 0.

These differences cause no influence to radio specification.
Even if a sales customer changes, the radio specification is never changed.
Therefore we can consider them electrically identical.

Example 1

“A” customer

Example 2

“B” customer
