Setup & use

Install baby unit: Place the baby unit on a flat surface, such as a bureau, shelf, desk or cabinet (Figure1) . Make sure the baby unit is within 3 feet from the crib and the power line should be put behind the baby unit. Adjust the baby unit until it faces the sound source.

Step1: Put the baby unit 3 feet away from baby. Long press the On / Off button (Figure2) for about 2 seconds until the power led shows green to turn on the baby unit.

Step2: Long press the parent unit On / Off button (Figure3) for about 2 seconds until the power led shows green to turn on the parent unit.

Step 3: Your baby is always eager to your voice when crying. Press and hold the Talk Volume up / Talk Back button (Figure4) on the monitor to activate two-way communication. Release the button to end the two-way communication mode.

Step 4: To turn the monitor off completely, press and hold the On / Off button for 2 seconds.

VOLUME CONTROL

Volume adjustments allow higher volume settings for parents who want to hear every little sound from baby, like cooing, and lower volume settings to monitor louder sounds and crying from baby. Easily adjust your desired volume level by double pressing Volume up / Talk Back button or Volume Down button.

FCC Information

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
