

How to operate your RGB light pods with remote

- 1 Install PODs according to fixture instructions.*
- 2 To **set the color** of your light:
For fixtures with multiple RGB PODs: Click on the MAX Warm, Neutral or Cool White buttons to sync the PODs before changing the color, and then
 - i. Either add or remove Red, Green or Blue by pressing the + or – symbols for each color
 - ii. Or, press the  button to start cycling through the colors of the rainbow. Press the  button once you see your favorite color
- 3 For **max brightness**: Select . This will set all LEDs to their maximum brightness setting.
- 4 To **adjust brightness**: Select the  button to cycle through four brightness levels.
- 5 To **set Memory buttons**: Set your light to the desired setting, then press and hold the memory button (  ) you wish to program for three seconds. The light will blink to indicate the setting has been saved. Recall memory sets by pushing on the pad. If the color is based off the Auto Cycle, the memory buttons will not register the setting.
- 6 For all other button functions, see reverse side for diagram.

*For POD installation, refer to the manual that came with your light fixture, or find it at www.marineland.com. If you need additional assistance, call us at 1-800-322-1266.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

WARNING: Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: 1) Reorient or relocate the receiving antenna. 2) Increase the separation between the equipment and receiver. 3) Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. 4) Consult the dealer or an experienced radio/TV technician for help.

This device complies with Industry Canada license-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes: (1) l'appareil ne doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.
