Connect to Bluetooth devices, disconnection and continuous connection

There are 2 ways to realize the Bluetooth connection: 1) the watch rise up a Bluetooth connection requirement, 2) the smart phone rise up a Bluetooth connection requirement

After a successful connection of Bluetooth, Smart Watch will automatically send a request requires reading smart phone phonebook and call log (involving personal privacy, some smart phone do not turn on this feature) Please confirm the smart phone, or else the watch can not be synchronized to the phone book and call history will affect its normal use.

If the distance between the watch and smart phones is more than 10 meters (there should not be any obstructions, or it might shorten the strength of the signal) they will be automatically disconnected, if the distance can be recover to 10 meters less again within 5 minutes, the connection could be recovered automatically.

Both of the watch and smart phone will alarm when disconnection happens.

Features

- **Bluetooth**, search for Bluetooth devices, connection, disconnection and other operations.
- **Dialing** Press this button when the watch is on main menu interface, to enter dial interface, or dial numbers though ‘call log’ menu.
 - * Do not block the speaker or microphone position during a call.
- **Information** Read the short message from the connected smart phone synchronously
- **Phone book** synchronization of the phone book.
- **Call log** Synchronize phone call records of the “missed call”, “Dialed”, “Received Calls”, “All records”, Maximum 30 records.
- **Bluetooth notification** Can view the push notifications of applications like QQ, short messages from connected smart phone.
- **Bluetooth music** can play music on your smart phone via Bluetooth.

Some smart phones will need to open the music player software to run properly. Press dial into/flip key to adjust the volume of music, Or directly touch the “+”, “-“ buttons on the screen. The watch will return to the initial interface after stopping pressing the key or screen, no need to press exit key manually.

- **Remote camera** control via Bluetooth smart phone camera to take the pictures.
 - * The smart phone should not be on the status of screen locking, or this function won’t work properly

- **Pedometer**

Pedometer designed specifically for health caring customers, to ensure the accuracy of the steps counting, we recommend the user to walk normally with a head and chest rising posture.

On the top of the pedometer displays time counting, on the left is steps counting, the distances (meters) is showing on the right, the consumption of calories is on the bottom. To start/stop the

counting by using the button in the middle. On the right above the screen is settings, it can adjust the parameters, reset or view the records. The pedometer can run in the background.

To avoid false count, the watch will not show up the numbers immediately after taking the initial steps for each user, but it starts to display after a stable walk counting, the number of previous steps is counted already.

* The Pedometer will clear the record of steps at one time everyday, then restart counting and accumulating till next time clearance. User can also clear the record by 'reset' button in the option menu.

- **Anti-lost alarm** When the connected smart phone is far away from watch over a certain distance. The watch will sound an alarm.
- **Power saving mode**
